Unique crypto product for Europe's decision-makers: Sectra's Tiger receives dual security approvals

Sectra's Tiger system for eavesdrop-secure telephone conversations has been certified by NATO's military committee for communications up to and including the high security level NATO SECRET. Last year, the same system was certified by the EU. Consequently, Tiger now has dual security approvals which give Sectra a unique position in the European market.

"The security approval is unique and will simplify daily work for our European customers with NATO membership. Decision-makers with EU and NATO membership are now able to use our Tiger system to eavesdrop-secure all telephone calls," says Jan-Olof Brüer, President and CEO of Sectra.

Last year, the Council of the European Union approved Sectra's Tiger XS for communication of EU-classified information. Sectra is still the only company to offer a system that protects both fixed and mobile telecommunications up to and including the high security level SECRET UE.

Tiger protects European telephone conversations

Tiger products protect telephone calls for decision-makers, officials and military staff in more than half of the EU's 27 member states. Protecting telephone conversations is the main function of the Tiger XS but it is also used to secure fax and data transfers. The possibilities to choose network are numerous. Telephone calls can be protected over ordinary telephone lines, GSM, ISDN and IP networks as well as via satellite systems.

About Sectra's secure communication systems

Sectra develops and sells products for secure voice and data communications. The customers are primarily government authorities and defense departments in Europe with strict demands on communications security. Sectra has strong core expertise in encryption and is one of the world's leading companies in the design and development of secure communications systems. Sectra's Tiger products are used by customers in more than half of the 27 EU member states.

About the Sectra Group

Sectra successfully develops and sells cutting-edge products in the expansive niche segments of medical systems and secure communication systems. The company was founded in 1978 and has its roots in the Linköping University in Sweden. Today, Sectra has offices in eleven countries and operates through partners worldwide. Sales in the 2007/2008 fiscal year totaled SEK 743 million. The Sectra share is listed on the OMX Nordic Exchange in Stockholm. For more information about Sectra visit <http://www.sectra.com>.
