# Third quarter report 2008

Unaudited

## Financial highlights

### Third quarter 2008

- Pre-tax operating profits before write-downs were NOK 4.4 billion (3.7)
- Profit for the period was NOK 2.8 billion (3.7)
- Return on equity was 15.5 per cent (21.8)
- Earnings per share were NOK 2.12 (2.72)
- The cost/income ratio was 50.6 per cent (51.3)
- The core capital ratio, including 50 per cent of interim profits, was 6.7 per cent (7.2)

### **January through September 2008**

- Pre-tax operating profits before write-downs were NOK 10.5 billion (11.5)
- Profit for the period was NOK 7.3 billion (9.9)
- Return on equity was 13.0 per cent (19.8)
- Earnings per share were NOK 5.39 (7.32)
- The cost/income ratio was 55.6 per cent (50.1)

Comparable figures for 2007 in parentheses.

There has been no full or partial external audit of the third quarter report and the third quarter accounts, though the report has been reviewed and major accounting items and notes audited by DnB NOR's Group Audit. The report has been reviewed by the Audit Committee.

## Report for the third quarter of 2008

Satisfactory performance in a highly challenging market

- Significant increase in net interest income
- Continued, but slowing, lending growth
- Improved spreads
- Cost developments under control
- Increase in write-downs on loans
- The authorities' measures have a stabilising effect
- The financial turmoil is not over

### Introduction

The Group's operations and profit performance were influenced by the financial market turmoil and the economic downturn during the third quarter of 2008. There was a marked shift, especially towards the end of the quarter. On 15 September, Lehman Brothers filed for creditor protection, which resulted in increased financial market turbulence, whereby parts of the financial markets ceased to function parallel to a rise in non-performing commitments and write-downs on loans. In consequence of extensive financial market turmoil, access to long-term funding became more restricted, and the price of such funding soared. The stock market plunge curtailed earnings in several of the Group's business areas through recorded losses on equities and a reduction in assets under management.

In spite of the challenges in financial markets, DnB NOR recorded a satisfactory level of profits in the third quarter. The DnB NOR Group achieved pre-tax operating profits before write-downs of NOK 4 361 million in the third quarter of 2008, up from NOK 3 694 million in the year-earlier period. Pre-tax operating profits were NOK 3 649 million and NOK 4 498 million respectively. Profits for the quarter were NOK 2 810 million, down from NOK 3 673 million in the third quarter of 2007. Third-quarter profits in 2007 included a NOK 865 million gain from the sale of DnB NOR's premises at Aker Brygge in Oslo. Return on equity was 15.5 per cent and 21.8 per cent respectively.

Net interest income showed a very healthy trend, reflecting both rising volumes and recoveries on previous margin shortfalls through price adjustments. In addition, the amortisation of previous writedowns on the bank's bond portfolio had a positive effect of NOK 282

Cost developments during the quarter were satisfactory relative to comparable operations, and the Group's cost programme yielded good results in the third quarter. In line with adopted growth strategies, there was a certain increase in staff levels both in Norway and internationally.

High interest rate levels and a decline in economic activity resulted in a rise in both non-performing commitments and write-downs during the quarter, especially in DnB NORD. However, the increase took place from a very low level. The volume of non-performing and impaired commitments relative to the total portfolio rose to the same level as in mid-2006, but was below the long-term, normalised level. There was a rise in group write-downs during the quarter due to higher volumes and more sluggish economic activity.

On 16 October 2008, the Norwegian Ministry of Finance laid down regulations based on changes in the accounting standards IAS 39 and IFRS 7 established by the IASB and approved by the EU. The changes open for the reclassification of portfolios previously classified as trading portfolios, to held-to-maturity investments. DnB NOR has considered this change in relation to the so-called liquidity portfolio in DnB NOR Markets. The Group has decided to reclassify the liquidity portfolio with effect from 1 July 2008, as provided by the new regulations. The reclassification implies that the portfolio will be recorded at amortised cost. The shift to a new category

will be based on the portfolio's book value as at 30 June this year. Following the reclassification, the accounting treatment of the portfolio will be in keeping with the portfolio's characteristics, as it is used for collateral in central banks, inter alia in connection with securities settlements. Previous accumulated write-downs for unrealised losses in the portfolio were NOK 2 586 million as at 30 June 2008. After the reclassification, the accumulated write-downs will be reversed over the residual maturity of the portfolio, which averages 3.25 years, and will be recorded under net interest income. If no reclassification had been made, the Group would alternatively have charged NOK 1 199 million to the 2008 third quarter accounts due to a further widening in margins. There have been no actual losses or events of default in the portfolio since the start of the financial turmoil, and the portfolio is still of superior quality. There will be no reclassification of other portfolios in the Group's balance sheet

There was strong growth in total assets in the Group's balance sheet during the third quarter of 2008, which was not least due to a significant rise in US dollar and euro rates. In addition, there was continued underlying growth in volumes, albeit with a diminishing growth rate. There was a 5.3 per cent increase in the loan portfolio from the second quarter of the year, of which two-thirds can be ascribed to exchange rate movements. Deposits were up 4.1 per cent from the second to the third quarter.

In consequence of the brisk growth, the core capital ratio declined to 6.7 per cent when 50 per cent of interim profits is included.

The Group's liquidity situation was sound, partly due to the raising of long-term loans earlier in the year. However, access to new long-term funding became more difficult towards the end of the quarter, and prices were very high. In October, the Norwegian government adopted new funding schemes which will inject new long-term liquidity into the market. DnB NOR assumes that the measures will contribute to a stabilisation in the Norwegian financial markets.

The performance of all business areas was affected by a greater or lesser degree by the financial market turmoil, resulting in rising money market rates, higher funding costs, increased write-downs on loans and falling market values in the third guarter of 2008.

Credit demand in Corporate Banking and Payment Services remained high throughout the third quarter, though growth was somewhat curbed as a result of the increase in interest rate levels. The quality of the loan portfolio was sound, but is expected to deteriorate somewhat due to the macroeconomic slowdown. Pre-tax operating profits before write-downs were NOK 2 322 million, up NOK 246 million from the year-earlier period. Adjusted for a negative change in the profit contribution from associated companies, profits rose by NOK 580 million.

In Retail Banking, net interest income from ordinary operations was roughly on a level with income in the third quarter of 2007. Changes in the interest rate structure compensated for higher funding costs. Streamlining measures, based on the Group's cost programme,

ensured a stable cost level and a reduction in staff numbers in the business area's Norwegian operations compared with the third quarter of 2007. Pre-tax operating profits before write-downs came to NOK 1 132 million, down NOK 80 million from the third quarter of 2007.

Customer-related income in DnB NOR Markets was maintained roughly on a level with the third quarter of 2007. The financial turmoil generated strong demand for currency, interest rate and commodity hedges, while income from other products was negatively influenced by the financial turmoil and falling stock markets. Strong fluctuations in both exchange rates and interest rates helped increase income from own-account trading. Due to the reclassification of the liquidity portfolio, no further changes in market values on bonds were reflected in the third quarter accounts. Pre-tax operating profits before write-downs were NOK 1 471 million in the third quarter of 2008, up NOK 1 420 million from the year-earlier period.

Life and Asset Management's accounts reflected the protracted stock market turbulence and fall in equity prices. The business area recorded an overall pre-tax operating loss of NOK 12 million in the third quarter of 2008, a reduction of NOK 718 million from the year-earlier period. This comprised a loss of NOK 45 million in Vital and a profit of NOK 33 million in DnB NOR Asset Management.

Performance in DnB NORD was influenced by a sharp rise in funding costs and higher write-downs on loans. Net customer lending showed continued brisk growth, though the growth rate was somewhat more sluggish in the Baltic region and is expected to slow further. DnB NORD achieved pre-tax operating profits before write-downs of NOK 188 million in the third quarter of 2008, up NOK 61 million compared with the year-earlier period.

In consequence of the financial turmoil, the previously presented estimate of annual profits for the DnB NOR Group in 2008 on a level with 2007 has become increasingly challenging to reach. DnB NOR will present updated long-term financial target figures during the first quarter of 2009.

### Income statement for the third quarter

### Income

Income totalled NOK 8 825 million for the July through September period in 2008, up NOK 1 236 million or 16.3 per cent from the third quarter of 2007.

### Net interest income

	3rd quarter	3rd	quarter
Amounts in NOK million	2008	Change	2007
Net interest income	5 691	1 029	4 663
Lending and deposit volumes		618	
Lending and deposit spreads		94	
Exchange rate movements		(67)	
Guarantee fund levy		(52)	
Amortisation effects in the liquidity po	rtfolio	282	
Other net interest income		155	

Net interest income was NOK 5 691 million in the third quarter of 2008, up 22.1 per cent from the year-earlier period.

Net interest income reflected the increase in lending, representing NOK 181 billion or 20.3 per cent on an average basis from the third quarter of 2007. Deposit growth averaged NOK 37 billion or 7.0 per cent. Lending spreads widened by 0.12 percentage points compared with the year-earlier period, standing at 0.97 per cent. The rise in spreads was a consequence of price adjustments which compensated for consecutive interest rate increases in the money market and lags in the repricing of loans. Deposit spreads declined by 0.14 percentage points during the period, to 1.16 per cent, reflecting intensifying competition.

Due to widening credit risk margins in global financial markets, DnB NOR's funding costs were NOK 136 million higher than in the third quarter of 2007.

With effect from 2008, Norwegian banks once again pay guarantee fund levies. For DnB NOR, there was an overall increase in levy payments of NOK 52 million from the third quarter of 2007. Full levy payments have been announced as from 2009, which is expected to result in a tripling of these costs.

#### Net other operating income

	3rd quarter	3rd	quarter
Amounts in NOK million	2008	Change	2007
Net other operating income	3 134	207	2 926
Net gains on foreign exchange and			
interest rate instruments 1)		870	
Net other commissions and fees		245	
Changes in credit margins		204	
Other operating income		107	
Stock market-related income including	9		
financial instruments		(518)	
Net financial and risk result from Vital	2)	(701)	

- 1) Excluding guarantees and changes in credit margins.
- 2) Excluding guaranteed returns and allocations to policyholders.

Net other operating income amounted to NOK 3 134 million, up 7.1 per cent from the third quarter of 2007.

Other operating income in the third quarter reflected the stock market turbulence and falling property prices, while sound earnings in the foreign exchange and interest rate markets had a positive effect. Due to market volatility, there was a high level of income from market making and proprietary trading, including sizeable gains from the conversion of currency loans.

The change in principle for recording DnB NOR Markets' liquidity portfolio in the accounts resulted in a NOK 666 million rise in net other operating income compared with the third quarter of 2007.

### **Operating expenses**

	3rd quarter	3rd	quarter
Amounts in NOK million	2008	Change	2007
Operating expenses	4 464	569	3 895
Norwegian units		341	
Of which:			
IT expenses		187	
Wage settlements		65	
Properties		58	
Operational leasing		50	
Cost programme		(62)	
Restructuring expenses, cost program	nme	11	
Other operating expenses		33	
International units		228	
Of which:		220	
DnB NORD		70	
Banking operations in Sweden		63	
SalusAnsvar		52	
DnB NOR Finans in Sweden, new ope	rations	22	
Other units	4.0113	20	
Other units		20	

Operating expenses totalled NOK 4 464 million, up 14.6 per cent from the third quarter of 2007. The increase reflected, among other things, the acquisition and establishment of new international operations.

Costs in Norwegian units rose by a total of NOK 341 million from the third quarter of 2007. Staff numbers declined by 24 full-time positions in Norwegian operations during the same period, in spite of the acquisition of leasing operations during the first quarter of the year, which resulted in 60 new full-time positions in the Group.

The Group's cost programme yielded results during the third

quarter, and measures implemented up till end-September will ensure lasting, annual cost reductions of approximately NOK 290 million. The quarterly accounting effect of the measures from the third quarter of 2007 to the corresponding period in 2008 was NOK 62 million. Restructuring costs in the third quarter were

Ongoing efforts are made to improve operational stability and modernise the Group's IT infrastructure and systems, resulting in a NOK 187 million rise in IT costs from the third quarter of 2007. In the longer term, these initiatives will ensure greater customer satisfaction and higher productivity.

The transition from financial to operational leasing and the expansion of leasing operations gave a NOK 50 million rise in depreciation on leasing objects.

The sale of bank properties and the transition to lease agreements caused a NOK 58 million increase in costs during the quarter compared with the year-earlier period, while financing costs were brought down.

Costs in the Group's international units rose by NOK 228 million during the third quarter compared with the year-earlier period, reflecting expansion and the acquisition of operations. The number of full-time positions in international units rose by 925 from the third quarter of 2007.

#### Net gains on fixed and intangible assets

Net gains on fixed and intangible assets were NOK 13 million in the third quarter of 2008, compared with NOK 874 million in the year-earlier period, reflecting the Group's sale of its premises at Aker Brygge in Oslo.

### Write-downs on commitments

Net write-downs on loans and guarantees came to NOK 725 million for the quarter, compared with NOK 70 million in the year-earlier period. NOK 250 million of the write-downs referred to DnB NORD. In consequence of a long, stable cyclical upturn, there has been a low level of write-downs for several years. However, there was a marked shift in the third quarter of 2008, and write-downs neared the average expected level in a normal economic situation.

Individual write-downs totalled NOK 599 million. The level of individual write-downs increased, especially towards the end of the quarter, and represented 0.22 per cent of lending on an annual basis. The rise was particularly steep in DnB NORD.

Group write-downs increased by NOK 132 million from the third quarter of 2007, mainly due to volume growth and a decline in economic activity.

After deductions for individual write-downs, net non-performing and impaired commitments came to NOK 6.9 billion as at 30 September 2008, up NOK 2.9 billion from end-September 2007. The increase reflected a general worsening of the economic situation. Non-performing and impaired commitments represented 0.61 per cent of lending volume at end-September 2008, compared with 0.44 per cent a year earlier.

### Taxes

The DnB NOR Group's tax charge for the third quarter of 2008 was NOK 839 million. The tax charge is based on an anticipated average tax rate of 23 per cent of pre-tax operating profits. The estimate is based on the assumption that the stock markets will normalise during the fourth quarter.

### **Balance sheet and liquidity**

### Balance sheet and assets under management

As at 30 September 2008, total combined assets in the DnB NOR Group were NOK 1 964 billion, up from NOK 1 789 billion a year earlier. Total assets in the Group's balance sheet were NOK 1 655 billion at end-September 2008, an increase from NOK 1 431 billion a year earlier.

Net lending to customers rose by NOK 210 billion or 23.1 per

cent during the twelve-month period, partly due to a number of small-scale acquisitions, strategic initiatives and general growth in the international corporate portfolio. Deposit volume was up NOK 56 billion or 10.5 per cent during the same period.

Total assets in Vital were NOK 221 billion as at 30 September 2008, a decline from NOK 232 billion twelve months earlier.

#### Liquidity

Due to the financial turmoil, the cost of long-term funding in the market rose considerably during the third quarter. New loans were raised at exceptionally high cost. At end-September 2008, the longterm funding market was, for all practical purposes, not functioning. The 90 per cent long-term funding limit set by the Board of Directors remained unchanged and was met during the third quarter. After the end of the quarter, the Norwegian government opened for long-term funding through the exchange of Treasury bills for covered bonds and mortgage-backed collateral. DnB NOR Boligkreditt issues such bonds based on DnB NOR's housing loan portfolio. These bonds have become an important tool to ensure favourable funding of the Group's operations. As part of the DnB NOR Group's long-term plan to strengthen its funding capability, extensive transfers of loan portfolios were made to DnB NOR Boligkreditt during the third quarter. At end-September 2008, conditions were fulfilled for issuing new bonds for a total of approximately NOK 30 billion, and additional issues for approximately NOK 60 billion will be arranged over the next three to four months. This will cover long-term loans maturing during the same period. The transfer of loan portfolios as a basis for long-term funding from Norges Bank will help the Group maintain its conservative liquidity profile. During the third quarter, Norges Bank also provided liquid funds for Norwegian banks in the form of US dollar and thus contributed to reducing foreign currency liquidity risk.

In order to keep the Group's liquidity risk at a low level, the majority of loans are financed through customer deposits, long-term securities, subordinated loan capital and equity. The Group's ratio of deposits to lending was 52.6 per cent at end-September 2008, down from 58.6 per cent a year earlier. The ratio of deposits to lending was 52.7 per cent in the banking group and 69.9 per cent in the bank in the third quarter.

Securities issued by the Group increased by NOK 168 billion or 52.9 per cent from end-September 2007, totalling NOK 485 billion as at 30 September 2008. Covered bonds represented 34 per cent of the bonds issued. The majority of the securities were issued in international capital markets.

### Risk and capital adequacy

The DnB NOR Group quantifies risk by measuring risk-adjusted capital. The table below shows developments in risk-adjusted capital:

	30 Sept.	30 June	31 March	31 Dec.
Amounts in NOK billion	2008	2008	2008	2007
Credit risk	50.7	48.6	47.5	42.6
Market risk	5.1	4.2	4.2	3.6
Ownership risk for Vital	5.9	5.6	7.3	8.5
Operational risk	6.7	5.6	5.6	5.2
Business risk	3.7	2.7	2.7	2.5
Gross risk-adjusted capital				
requirement	72.1	66.7	67.2	62.4
Diversification effect 1)	(14.1)	(12.2)	(12.6)	(13.6)
Net risk-adjusted capital				
requirement	58.0	54.5	54.6	48.8
Diversification effect in per cent				
of gross risk-adjusted capital				
requirement 1)	19.6	18.3	18.7	21.8

 The diversification effect refers to the effect achieved by the Group in reducing risk by operating within several risk categories where unexpected losses are unlikely to occur at the same time. Risk-adjusted capital for credit increased by NOK 2.1 billion from end-September 2007, to NOK 50.7 billion. The increase largely reflected a weaker NOK exchange rate against the dollar and the euro, resulting in an increase in foreign currency loans measured in Norwegian kroner. The measured credit quality remained stable in Corporate Banking and Payment Services and in Retail Banking. There was impaired credit quality in DnB NORD, and risk-adjusted capital relative to total exposure rose from 5.9 per cent to 6.4 per cent during the quarter. The calculations of risk-adjusted capital for credit are largely based on companies' accounting information, which implies that there might be a lag in risk measurement relative to actual developments.

There was a higher level of non-performance in Retail Banking's ordinary loan portfolio, from 0.48 per cent in the second quarter to 0.56 per cent in the third quarter. In Corporate Banking and Payment Services, the volume of non-performing and doubtful commitments rose by NOK 1 billion from the second to the third quarter, while DnB NORD recorded an increase of NOK 0.7 billion to NOK 1.9 billion during the corresponding period.

Risk-adjusted capital for market and insurance risk in Vital rose by NOK 0.3 billion to NOK 5.9 billion, reflecting lower anticipated returns on property investments. Vital used NOK 4.7 billion of the company's total additional allocations of NOK 8.6 billion to cover policyholders' guaranteed rate of return till end-September. The company's equity exposure was further reduced, representing 6 per cent at end-September. Developments in commercial property values represent the greatest element of risk for Vital's future return on financial assets.

The increase in the measured market risk is due to a higher interest rate level and greater utilisation of limits.

Risk-adjusted capital for operational risk and business risk rose by NOK 1.1 billion and NOK 1.0 billion respectively. These calculations are updated twice a year with effect for the first and third quarter of the year. A key factor behind the increases is the introduction of new calculation methods for such risk in Vital in the third quarter of 2008, which explains approximately 80 per cent of the increase.

The table below shows developments in the Group's equity relative to the capitalisation target:

	30 Sept.	30 June	31 March	31 Dec.
Amounts in NOK billion	2008	2008	2008	2007
4.25 per cent of risk-weighted asset	ets 47.2	44.4	42.5	42.1
Capital buffer	19.8	17.7	17.4	15.8
Core capital target excl. hybrid				
securities	67.0	62.1	60.0	58.0
Statutory deductions in core capita	l 9.3	9.5	15.5	13.6
Equity target	76.3	71.6	75.4	71.5
Actual equity 1)	74.5	72.8	77.1	76.0
Equity reserve	(1.8)	1.1	1.7	4.4

### 1) Includes 50 per cent of interim profits.

The equity reserve was reduced by NOK 2.9 billion to a negative NOK 1.8 billion, reflecting rising credit risk, which in the third quarter was mainly due to exchange rate movements. The Group is considered to be well capitalised based on communicated capitalisation targets. In connection with the financial turmoil, however, the standards for sound capitalisation have become more conservative. In light of this, DnB NOR will update its capitalisation policy and implement measures to ensure that the capitalisation of the Group supports the bank's AA long-term credit rating.

Risk-weighted volume included in the calculation of the formal capital adequacy requirement increased by NOK 63 billion during the quarter, to NOK 1 111 billion. Including 50 per cent of interim profits, the core capital ratio was 6.7 per cent, while the capital adequacy ratio was 9.4 per cent.

#### **Business areas**

The activities of DnB NOR are organised in four business areas according to the customer segments served by the Group and the products offered. In addition, DnB NORD is regarded as a separate profit centre.

The performance of the business areas was affected by the financial market turmoil, though there were strong variations between the business areas. The fall in market values primarily affected Life and Asset Management, while the other business areas were influenced by high funding costs and rising write-downs on loans.

### **Corporate Banking and Payment Services**

	3rd	3rd		
	quarter	quarter	(	Change in
Amounts in NOK million	2008	2007	Change	per cent

Net gains on fixed assets	0	3	(3)	(112.2)
Net write-downs on loans	216	(10)	226	0.0
Pre-tax operating profit	2 106	2 089	17	0.8
Average balance sheet items in I	NOK billion			
Net lending to customers	544.5	417.3	127.2	30.5
Deposits from customers	312.1	294.8	17.3	5.9
Key figures in per cent				
Return on BIS capital	14.0	19.4		
Cost/income ratio	34.4	32.7		
Ratio of deposits to lending	57.3	70.6		

Corporate Banking and Payment Services achieved pre-tax operating profits of NOK 2 106 million in the third quarter of 2008, an increase of NOK 17 million or 0.8 per cent from the year-earlier period. Adjusted for the negative profit contribution from Eksportfinans, the increase was NOK 343 million or 15.9 per cent. Third quarter performance was strongly influenced by the financial market turmoil, and the business area's operations reflected the rise in funding costs.

Credit demand was high throughout the third quarter of 2008, but growth was somewhat curbed as a result of the financial turmoil and an increase in interest rate levels. Nevertheless, rising exchange rates throughout the quarter entailed an increase in the NOK value of foreign currency loans and led to high lending growth in the third quarter. Average loans and guarantees grew by 29.8 per cent or NOK 144 billion from the year-earlier period, to NOK 629 billion. Lending to operations outside Norway accounted for a large proportion of the growth, primarily within the strategic priority areas of shipping, energy and seafood.

The rise in deposits has levelled off over the past few quarters, but there was a slight rebound in the third quarter of 2008 of 5.5 per cent from the previous quarter. Relatively weak deposit growth combined with brisk lending growth resulted in a 13.3 percentage point reduction in the ratio of deposits to lending from the third quarter of 2007.

Strong credit demand combined with rising funding costs gave a challenging pricing situation and created a need for a stricter lending policy. Relative to the money market rate, average lending spreads in the third quarter of 2008 were 1.16 per cent, an increase of 0.09 percentage points from the year-earlier period. Rising funding costs sharpened the competition for deposits and put pressure on deposit spreads. Average deposit spreads in the period were 0.63 per cent, a decline of 0.13 percentage points compared with the year-earlier period.

The turmoil in financial markets led to a 15 per cent increase in income from the sale of foreign exchange and interest rate products compared with the second quarter of 2008, while income was

unchanged from the third quarter of 2007. Syndication opportunities became more limited, but overall syndication activity remained at the same level as in the third quarter of 2007, and income from these operations rose during the period. Contributions from associated companies were considerably lower in the third quarter of 2008 than in the corresponding period in 2007, and the weak financial performance of Eksportfinans was the main reason for the negative profit contribution of NOK 375 million in the July through September period in 2008.

Strong expansion in strategic priority areas contributed to a rise in operating expenses compared with the year-earlier period. DnB NOR Finans' acquisition of operations in early 2008 also contributed to the increase, mainly in the form of depreciation on operational leasing, which increased by NOK 49.8 million from the third quarter of 2007. At end-September 2008, staff in the business area represented 2 550 full-time positions, including 723 positions in international units and 656 positions in Norwegian subsidiaries.

The quality of the loan portfolios remained sound during the quarter, but is expected to deteriorate somewhat due to expectations of a macroeconomic slowdown. There was an increase in net writedowns on loans in the third quarter of 2008 relative to a low level in the year-earlier period, reflecting that a growing number of corporate clients are noticing the changes in the economic situation. Net writedowns represented 0.16 per cent of net customer lending on an annual basis.

Customer satisfaction showed a positive trend. The market share of total lending in Norway increased by 0.3 percentage points from end-September 2007, to 15.1 per cent at end-August 2008. Compared with other commercial and savings banks, the market share declined and was one percentage point lower at end-August 2008 than at end-September 2007. An important reason for this development was a reduced exposure towards commercial property, where the market share has been reduced by 5.2 percentage points since December 2004. The market share of deposits in Norway increased for the fifth consecutive month, to 36.4 per cent in August 2008.

The consequences of the extensive global financial turmoil are expected to be a sharp levelling off of general credit growth and pressure on deposit spreads. However, if the markets normalise, Corporate Banking and Payment Services sees opportunities for future growth within its priority areas, and the business area is well equipped to meet the challenges and opportunities thus generated.

Key figures in per cent				
Return on BIS capital	43.3	25.3		
Cost/income ratio	59.3	55.7		
Ratio of deposits to lending	52.2	52.3		

Retail Banking recorded pre-tax operating profits of NOK 950 million in the third quarter of 2008, down NOK 209 million from the corresponding period in 2007. The decline in profits can be partly ascribed to the increase in funding costs and guarantee fund levies, higher costs due to international expansion and a rise in net write-downs on loans.

Deposits increased by 6.8 per cent from the third quarter of 2007, whereas lending volume was up 7.0 per cent. The ratio of deposits to lending remained stable. Stricter loan criteria were implemented in the last part of the quarter, parallel to a decline in demand for housing loans.

Adjusted customer prices compensated for higher funding costs and contributed to keeping net interest income from ordinary operations on a level with income in the year-earlier period. The weighted interest rate margin, defined as total margin income on loans and deposits relative to average loans and deposits, was 1.04 per cent in the third quarter of 2008, unchanged from the third quarter of 2007, but up 0.09 percentage points from the second quarter of 2008.

Other operating income reflected the turbulent financial markets. The quarter was characterised by reduced sales of mutual fund and insurance products and lower income from real estate broking activities in Norway. Recorded changes in the value of financial instruments in DnB NOR Boligkreditt's accounts made a positive contribution, together with income from payment services and from operations in Sweden.

There is good control over underlying costs through streamlining measures and staff reductions in the Group's Norwegian operations. Operating expenses rose by NOK 124 million from the third quarter of 2007 due to an increase in IT development activity and new operations in Sweden. Retail Banking staff numbered 3 944 full-time positions at end-September 2008.

Net write-downs on loans and guarantees rose by NOK 128 million from the year-earlier period, to NOK 182 million. Relative to average net lending, there was an increase in annualised write-downs from 0.05 per cent in the third quarter of 2007 to 0.16 per cent in the third quarter of 2008.

At end-August 2008, the market share of credit to retail customers was 28.5 per cent, down from 29.1 per cent at end-September 2007. The market share of savings was 35.7 per cent at end-August 2008. After the charge on all DnB NOR customer loyalty programmes was removed with effect from 1 May, the number of customers with loyalty programmes increased by approximately 40 000, which has helped increase lending and deposit volumes.

From 1 January 2009, DnB NOR will be responsible for all bank services at Oslo Airport. The agreement has a duration of five years. As the airport handles 20 million passengers annually, this gives DnB NOR a good platform for marketing its services.

DnB NOR is streamlining its daily banking services and branch network. In-store banking outlets are being introduced according to plan and are now also available for Nordlandsbanken customers. The Internet banks dnbnor.no and postbanken.no have received high scores for being user-friendly compared with other banks. The SMS services are popular and in the course of nine months the use of these services doubled. In August, approximately 1.5 million SMS messages were received, and the number is expected to increase to some 2 million SMS messages per month during the year. Account balance requests is the most popular service and accounts for approximately 90 per cent of the SMS messages.

Given the market situation, many customers regard bank deposits as the best investment alternative, and the offer of fixed-rate deposits has been well received.

Cost/income ratio	22.5	85.7		

DnB NOR Markets achieved healthy profits in the July through September period in spite of the continued global financial turmoil throughout the quarter. The business area recorded pre-tax operating profits of NOK 1 471 million, an increase of NOK 1 420 million from the third quarter of 2007. With effect from 1 July 2008, DnB NOR has availed itself of the opportunity to reclassify a bond portfolio of NOK 88 billion as held-to-maturity investments. As pointed out in the introduction, the portfolio would alternatively have been written down by NOK 1 199 million during the quarter.

Customer-related income totalled NOK 702 million in the third quarter, down NOK 25 million compared with the third quarter of 2007. New operations and products, an increase in IT development costs and higher salary costs resulted in an overall rise in costs.

Customer-related income from foreign exchange and interest rate and commodity derivatives was NOK 381 million, an increase of NOK 8 million from the year-earlier period. Due to highly volatile exchange rates, there was healthy demand for currency products. In addition, the high Norwegian money market rates and lower long-term interest rates increased demand for long-term interest rate hedges. Volatile commodity prices helped generate sound interest in the hedging of various commodity contracts. During the third quarter, the branch in Shanghai was granted a licence to offer derivatives in local currency.

Customer-related income from the sale of securities and other investment products came to NOK 105 million, on a level with the figure for the third quarter of 2007. Income from the sale of equities was reduced due to the fall in stock markets, while income from the sale of equity derivatives and bonds remained at a high level. There was a sharp drop in the sale of structured savings products due to changes in external parameters and the stock market downturn. In September, a research unit was established at the Singapore branch.

Customer-related revenues from corporate finance services totalled NOK 144 million, down NOK 6 million from the year-earlier period. Due to the financial market turmoil, there was a lower level of activity relating to stock exchange listings and share and bond issues. Financial advisory services, valuations and mergers and acquisitions thus grew in significance.

Customer-related revenues from custodial and other securities services came to NOK 71 million, a reduction of NOK 25 million from the year-earlier period, reflecting reduced prices and a lower level of activity in the stock market.

Earnings from market making and other proprietary trading were NOK 1 092 million, up NOK 1 514 million from the third quarter of 2007, when the portfolio was written down to fair value by a total of NOK 666 million. Extraordinarily strong fluctuations in interest rates and exchange rates due to the financial market turmoil helped increase income, partly through significant gains from converting foreign currency loans into the preferred currency.

<sup>1)</sup> Calculated on the basis of recorded equity.

Life and Asset Management recorded an overall pre-tax operating loss of NOK 12 million in the third quarter of 2008, which represented a reduction of NOK 718 million from the year-earlier period. This comprised a loss of NOK 45 million in Vital and a profit of NOK 33 million in DnB NOR Asset Management. The business area's financial performance reflected the protracted stock market turmoil and falling property values. Assets under management totalled NOK 530 billion as at 30 September 2008.

The descriptions of the financial performance of Vital and DnB NOR Asset Management are divided into two separate sections below

#### Vital

Assets under management	221.1	232.3	(11.2)	(4.8)
Key figures in per cent				
Return on equity 1)	(2.0)	37.3		

<sup>1)</sup> Calculated on the basis of recorded equity.

Vital recorded a pre-tax operating loss of NOK 45 million in the third quarter of 2008, which represented a reduction of NOK 672 million from the year-earlier period. The company used approximately NOK 1.6 billion of additional allocations in the third quarter of 2008 to cover policyholders' quaranteed rate of return.

Recorded and value-adjusted returns in Vital's common portfolio were negative at 0.1 per cent in the third quarter of 2008. The stock market turmoil was the main factor behind the low returns.

The company's equity exposure represented 6.0 per cent of assets in the common portfolio at end-September 2008. Investments in pure equities were scaled back, while private equity investments were maintained during the third quarter of 2008.

Property values were adjusted downwards by NOK 302 million in the third quarter of 2008. In the third quarter of 2007, the properties were revalued by NOK 5.6 billion.

In 2007, allocations of NOK 2.6 billion were made to cover greater commitments resulting from higher average life expectancy. Adjusted for this, there was a NOK 65 million increase in the risk result from the third quarter of 2007 to the corresponding period in 2008, reflecting a better result for disability insurance.

The administration result was negative due to costs of NOK 50

million relating to the winding-up of Vital's operations in Sweden.

There was a reduction in total assets. Rising interest rate levels and new tax rules for individual pension savings have resulted in surrenders of individual market products. Surrenders totalled NOK 2.4 billion in the third quarter of 2008, while total surrenders from end-September 2007 represented NOK 9.9 billion. At end-September 2008, recorded policyholders' funds within definedcontribution pension schemes totalled NOK 4.6 billion, and some 18 000 companies had entered into defined-contribution agreements.

As at 30 September 2008, Vital provided insurance coverage for more than one million policyholders through individual and group agreements. The customer portfolio also included agreements with around 25 000 companies, municipalities and public enterprises.

Vital launched new products for individual tax-incentive pension savings in June 2008.

Vital is working continuously to improve customer service and simplify work processes, while improving the quality of its IT systems. Parallel to cost reductions, operations will become more streamlined and uniform.

Operations in the Baltic region, where Vital has offices in Latvia and Lithuania, developed in line with the company's approved plans. It has been decided to wind up Vital's operations in the Swedish market

Vital's market share of total policyholders' funds was 33.4 per cent at end-June 2008, down 0.2 percentage points from year-end 2007. The company had a market share of 27.9 per cent within group pensions, a 0.1 percentage point increase from end-December 2007. In the individual market, the market share rose by 1.1 percentage points to 52.9 per cent during the corresponding period. The market share for defined-contribution pensions was 29.2 per cent, down 1.4 percentage points from end-December 2007.

As at 30 September 2008, solvency capital totalled NOK 12.4 billion, compared with NOK 21.8 billion as at 31 December 2007. Vital's interim performance and a reduction in the securities adjustment reserve were the main factors behind the reduction.

Vital aims to further expand its operations while providing the owner and policyholders with healthy returns. Key measures will be continued efforts to develop cost-effective and profitable operations while strengthening customer service and customer relations.

Assets under management	474.6	539.8	(65.1)	(12.1)
Key figures in per cent				
Return on equity 1)	5.1	12.0		
Cost/income ratio	84.9	74.1		

<sup>1)</sup> Calculated on the basis of recorded equity.

DnB NOR Asset Management recorded pre-tax operating profits of NOK 33 million in the third quarter of 2008, down NOK 46 million from the year-earlier period. The decline mainly reflected a shortfall in income due to a decline in assets under management and lower performance-based fees. Another factor influencing profits was the new distribution agreement with DnB NOR Bank, which entails an increase in commission rates for sales through the bank's distribution

Operating expenses were brought down as a result of measures implemented in connection with the Group's cost programme as well as special measures in DnB NOR Asset Management, Full-time positions numbered 295 at end-September 2008.

There was a NOK 65 billion reduction in assets under management from end-September 2007, NOK 46.4 billion of the decline stemmed from developments in equity prices and interest rate levels during the twelve-month period, while a weaker Norwegian krone gave a positive exchange effect of NOK 4.2 billion on international securities under management. The net outflow of funds was NOK 22.9 billion.

Investment funds from the retail market amounted to NOK 44.0 billion as at 30 September 2008 after a net reduction of NOK 19.6 billion from end-September 2007. The corresponding figures for institutional clients were NOK 430.7 billion and a reduction of NOK 45.5 billion respectively.

The market share for mutual funds in the Norwegian retail market was 38.3 per cent at end-September 2008, up 0.5 percentage points from end-June 2008.

As at 30 September 2008, the total number of mutual fund savings schemes exceeded 329 000. Annual subscriptions under savings schemes represented more than NOK 3.1 billion.

At end-September 2008, 52 mutual funds, representing 44.1 per cent of the funds managed by DnB NOR Asset Management, had received four or five stars from the rating company Morningstar.

DnB NOR Asset Management anticipates a weak market trend, but expects a long-term increase in private financial savings in both Norway and Sweden. Competition for new savings will necessitate the continued development of products and services. The expectations of investors regarding developments in financial markets together with investor confidence in the stock market will have a strong impact on performance in the business area.

Ratio of deposits to lending	29.1	38.1		

DnB NORD recorded a pre-tax operating loss of NOK 53 million in the third quarter of 2008, a reduction of NOK 149 million compared with the year-earlier period. Performance was influenced by a sharp rise in funding costs and higher write-downs on loans. DnB NORD benefits from a stable access to funding through its owners DnB NOR and

Net customer lending showed continued brisk growth, though the growth rate was somewhat more sluggish in the Baltic region and is expected to slow further. The market for customer deposits was characterised by fierce competition and narrower spreads, resulting in a relatively weak development in deposits.

There was a 29 per cent increase in total income from the third quarter of 2007. Net interest income was affected by rising funding

At end-September 2008, DnB NORD staff represented 3 565 fulltime positions, up from 3 144 a year earlier.

Net individual write-downs on loans represented 1.02 per cent relative to net lending, up from 0.25 per cent in the year-earlier period. The rise in write-downs can be ascribed to the economic slowdown, and this trend is expected to last for some time. The most pronounced increase refers to commercial property in Denmark, with write-downs of NOK 107 million.

DnB NORD is well represented in the Baltic region and Poland, serving both retail and corporate customers. In Denmark and Finland, DnB NORD is a full-service bank for corporate customers. DnB NORD had more than 820 000 customers and 174 branches at end-September 2008.

Economic growth in the Baltic countries is expected to remain sluggish in the fourth quarter of 2008 and in 2009, and DnB NORD expects a rise in write-downs for these operations. Developments in Denmark represent a challenge. In spite of the economic slowdown, there are some positive signals. The Latvian government budget is in balance, while the relatively diversified Lithuanian economy will facilitate a better adjustment to the lower growth rate. DnB NORD will have a prudent approach to these markets.

### **Macroeconomic developments**

The world economy has experienced dramatic changes in 2008, and the strong growth of previous years has reversed. The problems in the US financial markets escalated during the quarter and became particularly acute after Lehman Brothers filed for bankruptcy in September. Several financial institutions in the United States and Europe have gone into insolvent liquidation or have been rescued by their governments. Extensive measures have been implemented to stabilise the financial system and improve access to credit. The risk of a protracted recession has increased.

In Norway, the economic turnaround is now being felt. The property market has weakened, and household demand has stagnated. Norwegian companies expect considerably lower future activity. The financial turmoil has led to higher lending rates and stricter collateral requirements for companies and households. Investment and credit growth remains high, but is expected to decline further during the autumn. High oil prices have generated solid profits for the oil industry and a high level of activity for subcontractors. This sector has forecast sound investment growth for both 2008 and 2009. A continued fall in oil prices will influence future

investment willingness. Inflation has risen in consequence of high energy and commodity prices and strong wage growth. An international economic slowdown is expected to curb price inflation, but a weakening of the Norwegian krone may contribute to limiting the possibility of a reduction in interest rates. It is expected that weaker growth prospects, risk premiums in the money market and lower international key interest rates will lead to several reductions in the Norwegian key rate over the next twelve months. Lower corporate earnings are expected to curb deposit growth, but an increase in household savings is expected to counteract this to a certain extent.

#### **Future prospects**

At end-September, the financial markets were practically non-functioning. In such a situation, an analysis of future prospects must be seen in light of the fact that the Norwegian economy is stronger than in many other countries. The Norwegian government has the required financial flexibility to implement measures to partially counteract the negative trend in the Norwegian financial market. In October, the government established schemes which will help increase the access to long-term funding.

The considerable financial turmoil is expected to weaken the level of economic activity among the Group's customers. This will probably result in a steep decline in general credit growth and an increase in write-downs on loans. Nevertheless, ordinary operations in DnB NOR are stable and sound, with a solid and growing customer base. DnB NOR also sees future growth opportunities within the Group's priority areas when the markets begin to function close to normal again.

Macroeconomic forecasts indicate that the downturn currently affecting the world economy will probably be protracted. DnB NOR is well equipped to meet such a period of recession. However, the Group's capitalisation should be strengthened to be better prepared to meet any unexpected developments.

Stricter capital adequacy requirements for financial institutions must also be expected in the wake of the financial turmoil. Many international institutions have already considerably strengthened their capital bases or announced higher future capital adequacy targets. DnB NOR must adapt to this situation and will work to strengthen the Group's capital adequacy. In this connection, the Board of Directors will consider the level of dividends for 2008.

Oslo, 29 October 2008 The Board of Directors of DnB NOR ASA

Deposits with credit institutions with no agreed period of notice 2)	7 996	5 912	6 119

<sup>1)</sup> A significant share of the Group's operations was funded by issuing bonds and commercial paper in 2007 and the first three quarters of 2008.

The cash flow statement shows receipts and payments of cash and cash equivalents during the year. The statement has been prepared in accordance with the direct method and has been adjusted for items that do not generate cash flows, such as accruals, depreciation and write-downs on loans and guarantees. Cash flows are classified as operating activities, investment activities or funding activities. Balance sheet items are adjusted for the effects of exchange rate movements. Cash is defined as cash and deposits with central banks, and deposits with credit institutions with no agreed period of notice.

<sup>2)</sup> Recorded under "Lending to and deposits with credit institutions" in the balance sheet.

For definitions of selected key figures, see next page.

## Key figures (continued)

### **Definitions**

- 1, 2, 3 Based on nominal values excluding lending to and deposits with credit institutions and impaired loans, measured against the 3-month money market rate.
- 5 Total expenses relative to total income. Expenses exclude allocations to employees.
- Profit for the period, excluding profit attributable to minority interests, adjusted for the period's change in fair value recognised in equity. Average equity is calculated on the basis of recorded equity excluding minority interests.
- RARORAC (Risk-Adjusted Return On Risk-Adjusted Capital) is defined as risk-adjusted profits relative to the risk-adjusted capital requirement. Risk-adjusted profits indicate the level of profits in a normalised situation. The risk-adjusted capital requirement is described in further detail in the chapter "Management in DnB NOR" in the DnB NOR Group's annual report for 2007.
- 8 RORAC (Return On Risk-Adjusted Capital) is defined as profits for the period relative to risk-adjusted capital requirement. Profits for the period exclude profits attributable to minority interests and are adjusted for the period's change in fair value recognised directly in equity and for the difference between recorded interest on average equity and interest on risk-adjusted capital.
- 10 Profit for the period relative to average risk-weighted volume.
- 22 Total assets under management for customers in Life and Asset Management.
- 23 Total assets and customer assets under management.
- 25 Total deposits from customers, assets under management and equity-linked bonds.
- The Annual General Meeting on 30 April 2008 authorised the Board of Directors of DnB NOR ASA to acquire own shares for a total face value of up to NOK 1 332 653 615, corresponding to 10 per cent of share capital. The shares may be purchased through the stock market. Each share may be purchased at a price between NOK 10 and NOK 150. The authorisation is valid for a period of 12 months from 30 April 2008. Acquired shares shall be redeemed in accordance with regulations on the reduction of capital. An agreement has been signed with the Ministry of Trade and Industry for the redemption of a proportional share of government holdings to ensure that the government's percentage ownership does not change as a result of the redemption of repurchased shares. DnB NOR has no outstanding subscription rights for employees.
- 29 Excluding discontinuing operations and profits attributable to minority interests. Holdings of own shares are not included in calculations of the number of shares.
- Closing price at end of period less closing price at beginning of period, including dividends reinvested in DnB NOR shares on the dividend payment date, relative to closing price at beginning of period.
- 33 Equity at end of period excluding minority interests relative to number of shares at end of period.
- 34 Closing price at end of period relative to annualised earnings per share.
- 36 Closing price at end of period relative to recorded equity at end of period.
- Number of shares multiplied by the closing share price at end of period.

### Note 1 Accounting principles etc.

### **Accounting principles**

The third quarter accounts have been prepared according to IAS 34 Interim Financial Reporting. A description of the accounting principles applied by the Group in preparing the accounts is found in the annual report for 2007 and in the description under 'Change in principle' below. The annual and interim accounts are prepared according to IFRS principles as approved by the EU.

### Change in principle

On 13 October 2008 the International Accounting Standards Board, IASB, approved amendments to IAS 39 Financial Instruments and IFRS 7 Financial Instruments – Disclosure, permitting the reclassification of financial assets in the categories "fair value through profit or loss" and "available for sale" to other categories for financial assets. To qualify for reclassification, special circumstances must have occurred and according to the IASB, the prevailing situation in the credit markets can be regarded as rare circumstances. The reclassification can be made with accounting effect from 1 July 2008. The EU approved the amendments on 15 October 2008. On 16 October 2008, the Norwegian Ministry of Finance laid down regulations resulting in changes in the accounting standards IAS 39 and IFRS 7.

In the accounts for the third quarter of 2008, the Group chose to reclassify the liquidity portfolio in DnB NOR Markets from "fair value through profit or loss" to the "held to maturity" category.

On initial recognition, the liquidity portfolio was listed in an active market and was included in the "fair value through profit or loss" category. In an active market, it is possible to obtain external observable prices, exchange rates or volatilities which represents actual, frequent market transactions. During the ongoing financial turmoil, the bond markets, with the exception of the market for government papers, have gradually become inactive and illiquid. In this situation, it has been difficult to judge what represents forced sales (fire sales) of bonds from banks and investors who have had to liquidate their positions and what are normal transactions which are representative for valuation purposes. Against this background, DnB NOR reviewed a classification to the category "held to maturity". The new classification is in keeping with the portfolio's original characteristics, as it is, inter alia, used for collateral in central banks. With effect from 1 July 2008, the Group intends to hold the liquidity portfolio to maturity. The reclassification implies that the portfolio will be recorded at amortised cost on the reclassification date, which represents fair value as at 1 July 2008.

Due to changes in IFRS 7 the reclassification, as described above, requires that the value of the liquidity portfolio based on the principles applied before the reclassification must be reported. See note 14 Investments in bonds for a description of the effects of the reclassification.

### Note 1 Accounting principles etc. (continued)

### Comparable figures

Comparable figures have not been restated following the acquisitions of SkandiaBanken Bilfinans in 2008 and SalusAnsvar in 2007 or in consequence of the reclassification of financial instruments in the liquidity portfolio in the third quarter of 2008.

### Note 2 Estimates and special circumstances during the quarter

### **Estimates**

When preparing the consolidated accounts, management makes assessments and estimates and prepares assumptions that influence the effect of the accounting principles applied and thus the recorded values of assets and liabilities, income and expenses. A more detailed account of important estimates and assumptions is presented in notes 1 and 2 in the annual report for 2007.

#### **Estimate uncertainty**

Estimates and discretionary assessments are subject to continual evaluation and are based on historical experience and other factors, including expectations of future events that are believed to be probable on the balance sheet date.

The Group makes estimates and assumptions concerning the future, and the resulting accounting estimates will rarely be fully consistent with the final outcome.

The current financial turmoil increases the uncertainty surrounding some of the assumptions and expectations underlying the preparation of the various estimates. See also notes 8, 14, 15, 16 and 17.

#### Write-downs on loans

Loans to customers and loans to and deposits with credit institutions are carried at amortised cost, apart from fixed-rate loans, which are carried at fair value. If objective evidence of a decrease in value can be found and has occurred on the balance sheet date, write-downs on loans are calculated as the difference between the value of the loan in the balance sheet and the discounted value of estimated future cash flows. The discount rate used is the internal rate of return on the loan before objective evidence of impairment was identified. In principle, all cash flows relating to the commitment should be identified, and an assessment must be made as to which cash flows are at risk. Given the large number of commitments that are reviewed at both individual and group level, such estimates must be based on approximations and empirical data.

The assumptions made about the future will affect the calculation of expected cash flows. Due to the financial turmoil, great uncertainty surrounds future economic developments. This is reflected in the calculation of the present value of estimated future cash flows.

The group write-down model and the factors included therein are under continuous review. In the third quarter, a new assessment of the loss rates in the model has been made to make adjustments for the economic situation.

### Special circumstances during the quarter

In the days preceding the end of the quarter, the foreign exchange and interest rate markets were unusually volatile, resulting in high income from trading activities based on the bank's interest rate position. See also note 20 Liquidity risk.

### Note 3 Changes in group structure

### SkandiaBanken Bilfinans

In order to further strengthen its market position, DnB NOR, through its subsidiary DnB NOR Finans, acquired SkandiaBanken Bilfinans in Norway and Sweden and has thus become one of the key providers of car financing in Scandinavia. The operations in Norway were taken over with effect from 31 January 2008, while the company's operations in Sweden were taken over on 29 February 2008.

Information about the acquisitions, including preliminary acquisition analyses, was presented in DnB NOR's report for the first quarter of 2008. This information remained unchanged at end-September 2008.

### Svensk Fastighetsförmedling

The acquisition of Svensk Fastighetsförmedling was made with accounting effect from 30 June 2007. The agreement included a proviso regarding increased payment for the company if 40 per cent or more of negotiated sales result in loan applications to DnB NOR during the first two years after the agreement was entered into. At the time of acquisition, this was not considered to be a likely outcome based on experience from similar operations in Norway. However, the target was reached one year after the agreement date, resulting in an additional payment of SEK 43 million in July 2008. Goodwill relating to the acquisition has consequently increased by SEK 43 million. Due to changes in prices and other adjustments in the Swedish market, no corresponding additional payment is expected.

### Note 4 Business areas

The operational structure of DnB NOR includes four business areas and four staff and support units. In addition, DnB NORD is reported as a separate profit centre. The business areas carry responsibility for customer segments served by the Group, as well as the products offered.

The income statement and balance sheet for business areas have been prepared on the basis of internal financial reporting for the functional organisation of the DnB NOR Group into business areas. Figures for the business areas are based on DnB NOR's management model and the Group's accounting principles. The figures have been restated in accordance with the Group's current principles for allocating costs and capital between business areas and are based on a number of assumptions, estimates and discretionary distribution.

The eliminations refer mainly to internal services from support units to business areas and between business areas. Further, intra-group transactions and gains and losses on transactions between companies in the Group are eliminated. The elimination of double entries primarily concerns net profits on customer business carried out in cooperation between DnB NOR Markets and other business areas and taken to income in both areas.

The Group Centre includes Operations, HR (Human Resources), IT, Group Finance and Risk Management, Corporate Communications, Corporate Centre, investments in IT infrastructure and shareholder-related expenses. In addition, the Group Centre includes that part of the Group's equity that is not allocated to the business areas.

- 1) Based on nominal values and includes lending to and deposits from credit institutions.
- 2) Assets under management include total assets in Vital.
- 3) Total operating expenses relative to total income.
- 4) Deposits from customers relative to net lending to customers.
- 5) Return on capital is calculated on the basis of allocated capital. Allocated capital for Corporate Banking and Payment Services, Retail Banking, DnB NOR Markets and DnB NORD is calculated as 6.5 per cent of risk-weighted volume. Recorded equity is used for Life and Asset Management.
- 6) Estimated return on capital is based on profit after tax. A tax rate of 28 per cent is applied for Corporate Banking and Payment Services, Retail Banking, DnB NOR Markets and DnB NOR Asset Management. A tax rate of 20 per cent has been used for DnB NORD, while accounted taxes are applied for Vital.
- 7) RORAC (Return On Risk-Adjusted Capital) is defined as profits for the period relative to risk-adjusted capital requirement.
- 8) An increase of 218 full-time positions in Retail Banking resulting from the acquisition of SalusAnsvar in December 2007.

### Note 5 Life and Asset Management

The business area Life and Asset Management in DnB NOR comprises Vital Forsikring ASA and DnB NOR Kapitalforvaltning Holding AS, both with subsidiaries. The tables below marked "Life and Asset Management" show selected income statement items and key figures for the whole area.

Vital Forsikring ASA including subsidiaries, hereinafter referred to as "Vital", is fully consolidated in the DnB NOR Group's accounts. Vital's lines of business are life insurance and pension savings. Profit sharing between policyholders and the owner in life insurance companies is based on special accounting regulations for such operations stipulated by the Norwegian Ministry of Finance. Regulations relating to profit sharing between the owner and policyholders in life insurance companies limit the DnB NOR Group's access to revenues and assets from life insurance operations. The tables below marked "Vital" describe the income statement and balance sheet for Vital as included in the DnB NOR Group's accounts.

<sup>1)</sup> Other interest expenses include interest rate adjustments resulting from interest swaps entered into. Derivatives are recorded at fair value.

<sup>2)</sup> Figures are annualised.

<sup>3)</sup> Kredittilsynet (the Financial Supervisory Authority of Norway) and the Ministry of Finance have not adapted capital adequacy or solvency margin capital regulations to IFRS.

<sup>4)</sup> Solvency margin capital is measured against the solvency margin requirement, which is linked to the company's insurance commitments. The solvency margin capital requirements for Norwegian life insurance companies are subject to regulations laid down by the Ministry of Finance on 19 May 1995.

<sup>1)</sup> Widening credit spreads have had a negative effect on Eksportfinans' liquidity portfolio of bonds. The company has entered into an agreement with a syndicate comprising most of Eksportfinans' owners. With effect from 1 March 2008, the agreement will protect Eksportfinans from further value reductions in the portfolio. Taking the guarantee into account, there was a negative profit contribution of NOK 396 million from the company in the third quarter of 2008.

### Note 8 Net gains on financial instruments at fair value

				DnR NC	OR Group

Net gains on financial instruments at fair value	1 615	439	2 280	2 486	3 185

<sup>1)</sup> The reclassification of the liquidity portfolio in DnB NOR Markets in the third quarter of 2008 resulted in a NOK 666 million rise in net gains on financial instruments at fair value compared with the third quarter of 2007.

<sup>2)</sup> Due to highly volatile interest rate markets in the third quarter of 2008, there was a significant rise in value of swap contracts used to convert foreign currency loans into the preferred currency. No corresponding gains can be expected in subsequent quarters.

### Note 14 Investments in bonds

### Information about the portfolios

The DnB NOR Group has investments in bonds through several of the Group's entities. DnB NOR Bank, DnB NORD, Vital Forsikring and the associated company Eksportfinans all have their own bond portfolios for a variety of purposes.

As part of ongoing liquidity management, DnB NOR Bank needs to maintain a holding of securities that can be used in different ways to regulate the liquidity requirement and as a basis for furnishing collateral for operations in various countries. Among other things, the securities serve as collateral for short and long-term borrowing in a number of central banks and as a basis for liquidity buffers to meet regulatory requirements.

The bank has chosen to cover its need for liquid securities by investing in high-quality international bonds. As at 30 September 2008, the liquidity portfolio in DnB NOR Markets represented the equivalent of NOK 88.0 billion. 98.7 per cent of the securities had an AAA rating, while none of the securities were rated lower than A. There were no synthetic securities in the portfolio and no investments in US sub-prime bonds or Collateralised Debt Obligations, CDOs. Residential Mortgage Backed Securities, RMBS, represented 75.8 per cent of the total portfolio, securitised loans to the corporate market 10.2 per cent, corresponding consumer finance loans 4.8 per cent and other loans 9.2 per cent.

In addition, DnB NOR Bank had Norwegian bonds and fixed-income securities equivalent to a balance sheet value of NOK 32.2 billion used for customer trading and position taking in Norwegian interest rate instruments.

Like DnB NOR Bank, DnB NORD and Eksportfinans use investments in bonds and fixed-income securities for liquidity purposes and as a basis for furnishing collateral to central banks. At end-September 2008, the value of the DnB NORD portfolio was equivalent to NOK 5.1 billion. Eksportfinans had a liquidity portfolio of NOK 66.4 billion. The Eksportfinans portfolio was structured largely in line with DnB NOR Bank's portfolio, though it contained a larger share of financial sector investments. Through its ownership interest and the issue of guarantees, DnB NOR Bank is exposed to 40.4 per cent of value changes in the portfolio.

Vital Forsikring's investments in bond portfolios are both in the form of ordinary financial investments and investments securing the company's long-term guaranteed rates of return to policyholders. At end-September 2008, Vital Forsikring had investments in fixed-income securities for a total of NOK 126.5 billion.

### Classification

In the third quarter accounts, the DnB NOR Group chose to reclassify the liquidity portfolio in DnB NOR Markets from the "fair value through profit or loss" category to the "held to maturity" category, cf. note 1 Accounting principles etc. This gave a NOK 1 481 million rise in profits compared with the result if the previous valuation principle had been retained. The portfolio is not managed as a trading portfolio, and the new classification is thus more in keeping with the portfolio's characteristics.

### Note 14 Investments in bonds (continued)

### Effects of the reclassification of the liquidity portfolio

- maturity effects		(267)	267	327	167	84	
Net gains on financial instruments at fair value		1 199	(1 199)	233	(1 566)	(1 253)	
Recorded unrealised losses at end of period	(2 304)	(2 304)	(3 785)	(2 586)	(2 819)	(1 253)	

### Measurement

With effect from 1 July 2008, the liquidity portfolio in DnB NOR Markets is reclassified as held-to-maturity investments. Vital's held-to-maturity portfolio represented NOK 53.3 billion at end-September. Portfolios in this category are recorded at amortised cost and written down if there is objective evidence of a decrease in value.

Other bond portfolios in the Group are classified as securities carried at fair value with changes in value recognised in profit or loss.

To set fair values, price estimates on the same securities are obtained from a number of brokers and brokerage houses. The price estimates are then compared. An assessment is also made of own transactions and of price information from known new issues. The price estimates are subject to ongoing assessment and analysis.

In cases where no price information for the individual securities is available, values are estimated based on information about corresponding securities with equivalent characteristics, i.e. rating, maturity, country and other criteria.

The reclassification in accordance with the amendments to IAS 39, as described above, requires that the value of the liquidity portfolio based on the principles applied before the reclassification must be reported. In a normal market situation, the liquidity portfolio would have been recorded at external observable prices. Due to the financial turmoil, such prices have been virtually non-existent. In order to meet the disclosure requirement at end-September 2008, the liquidity portfolio has been measured at fair value according to models used for financial instruments not traded in an active market. The model applied is based on a regression analysis whereby historical market data (explanatory variables) which have been observable even during the credit crisis are used to explain historical changes in value in the liquidity portfolio. During the period from the fourth quarter of 2006 up to and including the second quarter of 2008, the model shows a high level of correlation between changes in given market data and changes in value in the liquidity portfolio, which at the time was priced in an active market or through broker quotes which were believed to be fairly reliable. If this model had been applied to the liquidity portfolio in the third quarter of 2008, there would have been a loss of NOK 1 466 million, or NOK 1 199 million after deducting the maturity effects of previous recorded losses. A corresponding model has also been used for valuing the bond portfolio in Eksportfinans.

In line with previous practice, DnB NOR has obtained price estimates from brokers in the third quarter. As mentioned above, DnB NOR does not believe that these estimates as such give an adequate reflection of fair values. If the best of these prices had been used, the unrealised mark-to-market losses in the third quarter would have been approximately NOK 450 million higher than shown in the above table. The differential between stated prices from various brokers increased considerably during the quarter, and if average prices had been used, the mark-to-market losses would have increased by NOK 1 700 million.

The bond portfolios carried at fair value with changes in value recognised in profit or loss have developed as follows in 2008:

			DnB NOR Group		
	Accumulated				Accumulated
	unrealised	Net MTM	Net MTM	Net MTM	unrealised
	losses	change	change	change	losses
	30 Sept.	3rd quarter	2nd quarter	1st quarter	31 Dec.
Amounts in NOK million	2008	2008	2008	2008	2007
Portfolio					
DnB NORD	87				
Eksportfinans 1)	1 021	(351)	6	(363)	313
Vital <sup>2)</sup>	897				

The figures for Eksportfinans represent net mark-to-market losses included in DnB NOR's consolidated accounts, based on the Group's 40 per cent ownership interest, recorded according to the equity method, and its share of the guarantee for Eksportfinans' bond portfolio (40.43 per cent). Markto-market effects on Eksportfinans' funding and other profit elements in the company's accounts are not included. See also note 21 Information on related parties.

<sup>2)</sup> The figures represent gross values in Vital before they are broken down on portfolios and profits from the various portfolios are allocated to policyholders and the owner. Bonds in Vital are managed in combination with other investment categories, and thus the allocation of profits to policyholders and the owner cannot be unambiguously described for an individual asset class such as bonds.

### Note 15 Investments in shares

Investments in shares are carried at fair value. Measurement at fair value is described in Note 1 Accounting principles in the annual report for 2007. The market situation in the third quarter has resulted in greater uncertainty regarding fair value assessments, especially for shares not listed on a stock exchange.

The Group's investments in Private Equity, PE, and Management Buyout Funds totalled NOK 3.0 billion at end-September 2008, of which NOK 2.6 billion represented PE investments in Vital. When determining fair values, the industry's recognised guidelines for PE valuations are used. The industry standard has been prepared by the European Private Equity & Venture Capital Association, EVCA. The method is considered to represent the best estimate of fair values for investments in not very liquid equity instruments. The valuation as at 30 September 2008 takes into account the IASB's statement of 3 October 2008 and the reference to the statement from the U.S. Securities and Exchange Commission, SEC on 30 September 2008, which provides guidance for the stipulation of fair values in an illiquid market. DnB NOR Bank also has other investments in shares with limited trading. The largest investments are shown in the table below.

#### Share investments in inactive markets **DnB NOR Group** 30 Sept. ### Note 16 Investment property

Investment properties owned by the Group are principally owned by Vital Forsikring. Vital's property portfolio is recorded at fair value on the balance sheet date. Vital Forsikring values the properties based on internal models and external valuations. In the internal models, the present value of expected cash flows is estimated. Contractual cash flows are discounted with a normalised nominal required rate of return, whereas future non-contractual cash flows are discounted with a required rate of return which includes an extra risk premium. The model stipulates a required rate of return of 6.5 per cent during the contract period and, subsequent to this, 9.5 per cent for office premises. The anticipated inflation rate and the implicit assumption regarding real interest rates are kept unchanged during the two periods. The difference in the required rates of return thus solely reflects an increase in the risk premium. The increase in the risk premium of 3 percentage points is intended to compensate for the shift from a reliable and known cash flow to a cash flow which does not have the same degree of predictability. Hotels and shopping centres are valued using individual rates of return.

DnB NOR bases the calculation of the normalised required rate of return on a risk-free rate of interest, normally a government bond yield with a duration of three to five years, where a relevant risk premium related to the asset class or the project to be valued is subsequently added.

Vital Forsikring implemented a complete review of its investment properties by the end of the third quarter. The properties in Sweden have been valued based on obtained appraisal estimates of the investment properties, whereas the properties in Norway have been valued based on the company's own valuation model. To supplement the values in the internal model, ten appraisals were obtained for comparison with the internal value estimates. In the third quarter, the external valuations did not differ materially from Vital's own calculations. The review resulted in total write-downs of NOK 302 million during the third quarter. Write-downs totalled NOK 2 031 million for the first nine months of 2008.

The property portfolio has been restructured in 2008, whereby properties that were previously directly owned have been demerged in separate subsidiaries. The restructuring entails that sales are no longer subject to stamp duties, thus contributing to an increase in the value of the portfolio. Seen in isolation, the restructuring resulted in a NOK 839 million increase in the value of investment properties in the first half of 2008, classified as net gains on assets in Vital along with the reduction in value referred to above.

### Note 16 Investment property (continued)

#### Goodwill

The Group carries out an annual impairment test of all recognised goodwill. If there is objective evidence of impairment, the impairment test is updated during the year to verify whether values remain unchanged. Such objective evidence of impairment may result in a reduction in values if the present value of expected future cash flows must be considered to be negatively influenced by current incidents and it is possible to estimate the effect reliably. The financial turmoil and falling equity prices could be an indication of impairment which will require new testing where such action is considered to be relevant. The assessment of recoverable amounts is based on the value in use of the cash flow generating units.

When impairment testing is based on discounted cash flows, the discount rate in the model must be supported by relevant required rates of return in comparable markets. The information collected from these markets shows a great variation in comparable required rates of return, which are subject to discretionary assessment on the basis of available information on the balance sheet date.

Asset management operations are negatively influenced by the market situation, and goodwill relating to these operations was thus subject to a separate impairment testing in the third quarter. The underlying cash flows are based on the financial plan, which is management's best estimate of future developments. Expected volumes and income trends have been adjusted significantly downwards compared with the previous financial plan, based on the assumption of a gradual normalisation in financial markets. Costs remained relatively stable during the period, reflecting the approved cost programme, though new cost-cutting measures currently under consideration have not been taken into account.

The tests carried out show that the recorded value of goodwill is unchanged. The assumption of an improvement in stock markets which is expected to give a gradual increase in profits in DnB NOR Asset Management from 2010 is critical for the value of these operations. A reduction in cash flows of approximately 15 per cent per year relative to management's best estimate could cause the estimated value to fall below the value of recorded goodwill and thus entail a need for impairment. The test is based on a long-term required rate of return of 9 per cent for asset management operations, though the expected cash flow justifies the balance sheet values even if the required rate of return is just over 10 per cent.

### Note 18 Securities issued and subordinated loan capital

As an element in liquidity management, the DnB NOR Group issues and redeems own securities.

<sup>1)</sup> Outstanding covered bonds totalled NOK 84.8 billion as at 30 September 2008. The cover pool represented NOK 126.2 billion.

<sup>2)</sup> Perpetual subordinated loan capital securities are eligible for inclusion in core capital by an amount not exceeding 15 per cent of total core capital. Kredittilsynet may require that the securities should be written down proportionally to equity if the bank's core capital ratio falls below 5 per cent or capital adequacy ratio falls below 6 per cent. Amounts written down on the securities must be revalued before the distribution of dividends to shareholders or revaluation of equity.

### Note 19 Capital adequacy

The DnB NOR Group follows the Basel II regulations for capital adequacy calculations. Valuation rules used in the statutory accounts form the basis for the consolidation, which is subject to special consolidation rules governed by the Consolidation Regulations.

<sup>1)</sup> Perpetual subordinated loan capital securities can represent up to 15 per cent of core capital. The excess will qualify as perpetual supplementary capital.

Due to transitional rules, the minimum capital adequacy requirements for 2007, 2008 and 2009 cannot be reduced below 95, 90 and 80 per cent respectively relative to the Basel I requirements.

<sup>2)</sup> As at 30 September 2008, calculations of capital adequacy included a total of NOK 718 million in subordinated loan capital in associated companies, in addition to subordinated loan capital in the balance sheets of the banking group and the DnB NOR Group.

<sup>3)</sup> Upon implementation of NRS 6A (IAS 19) in 2005, unrecognised actuarial gains/losses for pension commitments were charged to equity in the accounts. The Ministry of Finance has established a transitional rule whereby one-fifth of the amount recorded against equity can be included in capital adequacy calculations in 2008.

<sup>4)</sup> Primary capital and nominal amounts used in calculating risk-weighted volume deviate from figures in the DnB NOR Group's accounts, as associated companies which are assessed according to the equity method in the accounts, are assessed according to the gross method in capital adequacy calculations.

### Note 19 Capital adequacy (continued)

### **Basel II implementation**

### **Further progress**

A major reduction in risk-weighted assets is expected upon full implementation of the IRB system. Below is a time schedule for the reporting of portfolios according to the IRB approach.

	2008	2009	2010

### Note 20 Liquidity risk

Liquidity risk is the risk that the Group will be unable to meet its payment obligations. Liquidity management in the DnB NOR Bank Group is organised whereby DnB NOR Bank ASA is responsible for funding subsidiaries such as Nordlandsbanken and DnB NOR Finans, as well as international branches and subsidiaries. DnB NORD is funded with a share corresponding to the DnB NOR Group's holding in the bank. Liquidity risk is managed and measured by means of various measurement techniques.

The Board of Directors has established internal limits which restrict the short-term maturity of liabilities during various time periods. In addition, limits have been approved for structural liquidity risk, which implies that lending to the general public should largely be financed through customer deposits, subordinated capital and long-term funding. The ratio of deposits to lending was 52.6 per cent at end-September 2008, down from 53.2 per cent at end-June 2008.

During the first six months of 2008, DnB NOR issued bonds and subordinated loans for a total of NOK 115 billion. Due to the financial turmoil, the cost of long-term funding in the market rose considerably during the third quarter. New long-term loans raised during the July through September period totalled NOK 24 billion, which helped ensure satisfactory liquidity for the Group throughout the quarter. The Group's liquidity has been within the internal limits for short-term and long-term liquidity during this period. The average residual maturity of the bond portfolio was 2.8 years at end-September, roughly unchanged from end-June.

At end-September 2008, the long-term funding market was, for all practical purposes, not functioning. The 90 per cent long-term funding limit set by the Board of Directors remained unchanged and was met during the third quarter. After the end of the quarter, the Norwegian government opened for long-term funding through the exchange of Treasury bills for covered bonds and mortgage-backed collateral. DnB NOR Boligkreditt issues such bonds based on DnB NOR's housing loan portfolio. These bonds have become an important tool to ensure favourable funding of the Group's operations. As part of the DnB NOR Group's long-term plan to strengthen its funding capability, loan portfolios totalling NOK 32.1 billion were transferred to DnB NOR Boligkreditt during the third quarter. At end-September 2008, conditions were fulfilled for issuing new bonds for a total of approximately NOK 30 billion, and additional issues for approximately NOK 60 billion will be arranged over the next three to four months. This will cover long-term loans maturing during the same period. The transfer of loan portfolios as a basis for long-term funding from Norges Bank will help the Group maintain its conservative liquidity profile. During the third quarter, Norges Bank also provided liquid funds for Norwegian banks in the form of US dollar and thus contributed to reducing foreign currency liquidity risk.

### Note 21 Information on related parties

Major transactions with related parties in 2008:

### **Eksportfinans**

DnB NOR Bank ASA has a 40 per cent ownership interest in Eksportfinans. Financial market turbulence resulted in sizeable unrealised losses in Eksportfinans' liquidity portfolio in the first quarter of 2008. In order to ensure an adequate capital base for the company, its Board of Directors implemented three measures:

- A share issue of NOK 1.2 billion aimed at the company's owners was implemented, and all owners participated based on their proportional shares.
- A portfolio hedge agreement was entered into, and the owners were invited to participate. As at 30 June 2008, shareholders representing 99.5 per cent of the shares had agreed to participate, including the Norwegian government, which has a 15 per cent holding. At end-June 2008, DnB NOR Bank ASA's share of the agreement corresponded to 40.43 per cent. The agreement secures Eksportfinans against further decreases in portfolio values of up to NOK 5 billion effective from 29 February 2008. Any recovery of values relative to nominal values will accrue to the participants in the portfolio hedge agreement as payment for their hedging commitment. Eksportfinans expects no losses in the portfolio in question and expects the bonds to be repaid at maturity.
- During the first quarter of 2008, Eksportfinans' largest owner banks, DnB NOR Bank ASA, Nordea Bank AB and Danske Bank A/S
  increased a committed credit line giving the company access to a liquidity reserve of up to USD 4 billion. DnB NOR Bank ASA's share
  of this agreement represents approximately USD 2.2 billion. At end-September 2008, Eksportfinans had not availed itself of this credit
  line.

The transactions with Eksportfinans have been entered into on ordinary market terms as if they had taken place between independent parties.

<sup>1)</sup> DnB NOR carries loans in its balance sheet that subject to legal agreement have been transferred to Eksportfinans and for which DnB NOR has issued guarantees. According to the agreement, DnB NOR still carries interest rate risk and credit risk for the transferred portfolio. Customer loans in the portfolio totalling NOK 9 187 million were recorded in the balance sheet as at 30 September 2008.

<sup>2)</sup> Liabilities included in issued financial quarantees are measured at fair value and recorded in the balance sheet.

<sup>3)</sup> As at 30 September 2008 NOK 61 768 million in securities has been pledged as collateral for credit facilities with Norges Bank (the Norwegian central bank). According to regulations, these loans must be fully collateralised by a mortgage on interest-bearing securities and/or the bank's deposits with Norges Bank.

### Note 22 Off-balance sheet transactions and contingencies (continued)

### **Contingencies**

Due to its extensive operations in Norway and abroad, the DnB NOR Group will regularly be party to a number of legal actions. None of the current disputes are expected to have any material impact on the Group's financial position.

In 2004, DnB NOR Bank issued a writ against the Norwegian government, represented by the Central Tax Office for Large Enterprises, requiring that the tax assessment for 2002 be invalidated. The bank claimed that the tax authorities made incorrect use of the realisation principle with respect to currency and interest rate swaps, as no tax credit was awarded for net losses in the tax assessment in line with the bank's view. The bank lost the case in the District Court in 2006 and in the Court of Appeal in April 2008. The decision has been appealed to the Supreme Court. The outcome will have no material effect on the Group's accounts.

Heidelberger Cement Pensjonskasse/Norcem AS has filed a complaint with the court of conciliation against Vital Forsikring, with a claim for damages of up to NOK 110 million. It is claimed that Vital Forsikring ASA gave incorrect advice in connection with a transfer of assets from a premium fund under the company's pension scheme. The claim is contested. The case was heard in the Bergen court of conciliation in January, where it was referred to the courts of law.

### **Accounting principles**

DnB NOR ASA has prepared accounts according to the Norwegian Ministry of Finance's regulations on annual accounts, Section 1-5, on the use of IFRS (International Financial Reporting Standards), hereinafter called the Norwegian IFRS regulations. These regulations give permission to record provisions for dividends and group contributions in subsidiaries as income and record the Board of Directors' proposed dividends and group contributions as liabilities on the balance sheet date. According to IFRS, dividends should be classified as equity until approved by the general meeting. A description of the accounting principles applied by DnB NOR ASA in preparing the accounts is found in the annual report for 2007.
