

Press release

Stockholm 5th December 2000

WinEasy and Intel in cooperation

Tele1 Europe's fully owned subsidiary WinEasy is launching a Dedicated WebServer in cooperation with Intel, a service which enables a cost efficient, secure and fast web presence for businesses.

"Since 1996 we have offered webhosting and since 1998, serverhosting. For some time now we have seen the need for a high quality middle offering. Dedicated WebServer is the answer to this need in that it combines the advantages of both categories," said Johannes Bertorp, CEO of WinEasy.

"From Intel's side we are very pleased to be working with one of the leading Nordic hosting companies to deliver the hardware-part of the service," said Gordon Graylish, Director for Intel Enterprise Solutions Group EMEA. "In our opinion the market will see the attractiveness of being able to turn to WinEasy and in a matter of hours have a dedicated, fully functional Intel® processor based server running on Windows* NT, to base their Internet presence on."

The service enables the customer to have access to their very own dedicated server in WinEasy's data center at Lidingö on which among other things, Windows NT and ISS applications can be run. Full operation and surveillance 24 hours a day is all part of the service. For WinEasy's customers it means that it will be no expensive cost only a nominal monthly fee.

About Tele1 Europe (NASDAQ: TEUR, Stockholm Stock Exchange: TEUR)

Tele1 Europe is a fast-growing data and telecommunications operator with operations in Denmark, Finland, Norway and Sweden. The group's business concept is to offer broadband solutions for data, telephony and the Internet to large and medium-sized business and organisations in the Nordic countries. Tele1 Europe is currently the only Nordic data and telecommunications operator investing in local access networks with broadband capacity. This construction is taking place in the nine largest cities in the Nordic countries. The access networks, which are linked together with a long-distance network, will be Europe's fastest "motorway" for data and Internet traffic with an initial capacity for customers of up to one gigabyte. <http://www.tele1europe.com>

About Wineasy

WinEasy started their Internet operations in 1995 and in December 1999 became part of the Tele1 Europe group. The company is a full service Internet Service Provider with a focus on hosting services. Customers include LetsBuyIt, Nokia, Thorn and Andersen Consulting. The company today employs 100 employees and has got activities in Sweden and Norway. <http://www.wineasy.com>
