

## **TietoEnator implements F-Secure's solutions to its security services in Europe**

TietoEnator has selected F-Secure as one of their vendors in the area of security services. The companies have signed a corporate level Security as a Service™ contract. According to the contract F-Secure's EnterpriseExpress service delivery platform will be used to deliver managed security services to European customers.

At the same time, TietoEnator and F-Secure have agreed on strengthening their co-operation to manage and develop the security environments of TietoEnator's customers.

"Security is the most fundamental cornerstone in TietoEnator's business, both in its internal processes and in its services to customers. The strategic co-operation between F-Secure and TietoEnator is an excellent example of creating world class solutions and services for the international markets," says Juhani Strömberg, Senior Vice President, Development, of TietoEnator.

"This agreement is a significant milestone for F-Secure's endeavour to extend the EnterpriseExpress concept to even larger service delivery environments," says Risto Siilasmaa, F-Secure's President and CEO. "TietoEnator has the processes, competencies and skills for rolling out the Security as a Service concept swiftly and reliably to their customers."

F-Secure's EnterpriseExpress is a state-of-the-art service delivery platform which allows service providers to offer managed anti-virus, VPN+ and distributed firewall services from a centralised location. Services can extend to client, server and gateway levels.
