

*Effective treatments for  
common skin disorders*

PRESS RELEASE APRIL 12, 2010

## **MOBERG DERMA OBTAINS APPROVAL FOR SEBORRHOEIC ECZEMA PRODUCT AND RECEIVES ISO 13485 CERTIFICATION**

Moberg Derma AB today announced that CE mark has been granted for its topical product for the management and relief of common scalp conditions associated with scaly and itchy skin, e.g. seborrhoeic eczema and dandruff. The CE mark provides authorization to market and sell the medical device product in the EU/EEA. The company also announced that it received ISO 13485 certification.

"We are now able to offer a new steroid-free treatment alternative in an indication area dominated by older products. The CE mark is a key milestone for the company and we look forward to making the product available to patients in collaboration with partners and distributors. The ISO 13485 certification is an important quality stamp of our operations", says Moberg Derma's President and CEO, Peter Wolpert.

### **About the product and seborrhoeic dermatitis**

The product is a prescription free topical solution indicated for the management of common scalp conditions such as seborrhoeic eczema and dandruff. Efficacy and safety have been demonstrated in several clinical studies including more than 300 patients. The product reduces itching and scaling and has a softening and moisturizing effect on the scalp.

Approximately 5% of the population suffers from seborrhoeic eczema of the scalp and skin. There is currently no cure for seborrhoeic eczema, which means that treatment focuses on minimizing symptoms, particularly scaling, erythema and itching.
