This presentation contains forward-looking statements that reflect management's current views with respect to certain future events and potential financial performance. Although Nordea believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of various factors.

Important factors that may cause such a difference for Nordea include, but are not limited to: (i) the macroeconomic development, (ii) change in the competitive climate, (iii) change in the regulatory environment and other government actions and (iv) change in interest rate and foreign exchange rate levels.

This presentation does not imply that Nordea has undertaken to revise these forward-looking statements, beyond what is required by applicable law or applicable stock exchange regulations if and when circumstances arise that will lead to changes compared to the date when these statements were provided.

Management buffer reflects Nordea's diversified business

¹⁾ Maximum Distributable Amount, provided for illustrative purposes only. The Swedish FSA does not normally intend to make a formal decision on the capital requirement under Pillar 2. "Insofar that a formal decision has not been made, the capital requirement under Pillar 2 does not affect the level at which the automatic restrictions on distributions linked to the combined buffer requirement come into effect." Swedish FSA, Sep 2014

³⁾ Capital need Q3 2015 in accordance with SREP, communicated by Nordea October 2, 2015

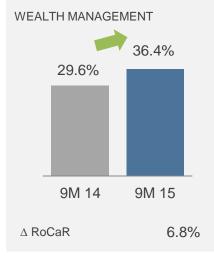

²⁾ The combined buffer consists of 3% systemic risk buffer, 2.5% capital conservation buffer and 0.4% countercyclical buffer. In accordance with Swedish FSA Memorandum on Capital Requirement for Swedish banks (Sept. 2, 2015), the calculation of the countercyclical buffer is based on the Swedish and Norwegian buffer rate of 1%. The buffer rates will increase from 1 to 1.5% when the new buffer rates enter into force in Q2 2016.
