- The Market Consistent Embedded Value model (MCEV) is a stochastic dividend stream model projecting future developments based on Monte Carlo simulations. The model calculates the dividend stream to the shareholders in each scenario and derives the Economic Value as the net present value of the dividend stream for the specific scenario
- The market consistency is obtained using risk free interest rates (government curves) and state price deflators for discounting. The input for the stochastic scenarios is based on historical observations of financial market data
- The specific embedded value for the individual scenario is calculated on the basis of the current local balance sheets, existing solvency regime, actuarial data and experience data for lapse rates, mortality rates etc.
- The MCEV is based on end of November 2015 data

MCEV - Movement

The MCEV for Nordea Life & Pensions is on the same level compared to year-end 2014. The key drivers of the underlying movements are:

- New Business:** A positive new business inflow with an MCEV impact of EUR 270m predominantly driven by the Swedish and Finnish Market Return products
- Financial effects:** Interest rate levels have decreased resulting in a decrease in the MCEV of EUR -221m. Denmark is most impacted due to the business composition and the local accounting as well as profit sharing principles being on a market value basis
- Dividend ('Other'):** A total dividend of EUR 303m has been paid out from the Danish, Finnish and Polish entities to Nordea Life Holding AB
- Income statement ('Other'):** Realised income of EUR 303m compared to expected transfer from VIF to shareholder's equity of EUR 379m
- Regulatory Changes ('Other'):** **New tax regulation in Sweden** came into force 1 January 2015. This has had an adverse impact on the level of premiums paid by customers leading to a negative impact on the MCEV of EUR -16
- Financial buffers ('Other'):** Financial buffer levels decreased during the period due to market movements resulting in a reduction in the MCEV of EUR -47m
- Increase in AuM ('Other'):** Positive MCEV contribution of EUR 80m, mainly driven by the Finnish and Swedish entities
- Additional impacts ('Other'):** In addition to the above items other explanatory factors are experience effects as well as improved business logic/assumptions

MCEV - Value of In-Force business (VIF)

(mEUR)	Value of In-Force	
	Q4/15	Q4/14

Finland	1 330	1 240
Norway	489	591
Poland	34	36
Sweden	638	386
Total	2 511	2 508

During the reporting period the value of Nordea Life & Pensions' In-Force business has increased by EUR 3m compared to year-end 2014. The key drivers are in line with overall MCEV changes explained above excluding the 'Income Statement' and 'Dividend' effects

MCEV - New Business and Margins

(mEUR)	Value of New Business		Margins	
	Q4/15	Q4/14	Q4/15	Q4/14
Traditional	0	0	0%	0%
Market Return	264	242	33%	40%
Risk	5	6	22%	21%

- The margin for Traditional and Market Return products is calculated on the basis of annual premium equivalent (APE) standard (10 years). For Risk products, the value of new business and the margin are calculated on a one-year horizon (annual margin) given the duration of the products
- The change in the margin for Market Return products is the effect of overall higher sales of New Business, where a relatively higher proportion now originates from markets with lower margin products combined with updated business logic/assumptions
- The value of new business within the Market Return products is higher than for Q4 2014 driven by a strong sale within the Finnish and Swedish business
- The value of new business within the Risk products is on the same level as for Q4 2014

D - Information on importance of encumbrance

The main source of encumbrance for Nordea is covered bond issuance programs where the required overcollateralization levels are defined according to the relevant statutory regimes. Other contributors to encumbrance are derivatives and repos where the activity is concentrated to Finland. Historically, the evolution of asset encumbrance for Nordea has been stable over time which illustrates the fact that the asset encumbrance for Nordea is a reflection of a structural phenomenon of the Scandinavian financial markets and savings behavior. Major part of the unencumbered assets are loans and the rest are equity instruments, debt securities and other assets.
