### Saab at Eurosatory 2014

**Saab will have a commanding presence at Eurosatory 2014 with a full range of land warfare systems on show. Eurosatory will also see the public debut of Saab's new surface radar portfolio, a revolutionary mix of technology, capability and cost-effectiveness that adds a new dimension to the air surveillance and air defence radar market, on land and at sea.**

Defence and security company Saab will attend the Eurosatory 2014 exhibition, held at the Paris-Nord Villepinte Exhibition Centre from June 16 to 20.

Eurosatory is universally recognised as one of the most important events for the international defence community and for Saab Eurosatory is a major opportunity to meet partners and customers from Europe and across the globe

“At Eurosatory we will demonstrate the depth of Saab capabilities in the land domain, “ says Tomas Samuelsson , President Market Area Europe and Greater Middle East. “The Saab name is synonymous with excellence in aerospace, but we are also a market leader in land and naval systems. We have a very broad product portfolio with a unique ability to package and integrate those products for our customers. We don't always have the space to show all of these products together, but Eurosatory gives us that room for manoeuvre.”

This year Saab is placing particular emphasis on its new surface radar product portfolio, its total training systems solutions and advanced vehicle systems. Tomas Samuelsson notes:

“In the radar sector we now have an entirely new product family, operating with an entirely new level of advanced technology and cost-effectiveness. It is a game-changer for Saab and for the market. We are already a world-class provider of training systems and this is an area that will only increase in importance as armed forces seek to maintain their capabilities while deployments are reduced. Finally, in vehicle systems, we have a broad and complete range of products that is very well-respected by our customers and is gaining an increasing footprint in the market.”

Saab will host three media briefings to provide the latest news and updates on these product ranges and their markets.

**10:00 Monday June 16. Saab stand, Hall 6, J303**  
**Saab Total Training Solutions**
