

SAAB

SAAB AT **ATC GLOBAL 2010**

9-11 March 2010
Amsterdam, Netherlands

TRANSFORM TODAY: INTELLIGENCE IN TRANSPORTATION

As the volume of air traffic continues to grow, the demand on operators becomes ever greater. It's vital to increase capacity while lowering cost and environmental impact. To prepare for tomorrow's demands, technology must evolve today.

Saab produces highly effective, efficient and intelligent ATC solutions. We deliver innovative new solutions that can radically improve safety while facilitating secure, efficient flows, maximising the competitiveness of your organisation or business.

Following the success of last year's event, I am pleased to announce our participation at ATC Global 2010. I hope that you will take the time to come and visit us at the exhibition and see some of the latest developments in ATC technology.

Kind regards

Per Ahl, Director, Sales Air Traffic Management

VISIT OUR STAND

We welcome all exhibition visitors to our stand. Our main demonstration will feature the Remotely Operated Tower, which includes new capabilities such as video tracking, automatic zoom for moving objects and map overlay of important areas. Other solutions on display include the e-STRIP electronic flight strip progress system and our weather and information systems for airports.

We hope to meet you at our stand: **no. D320**
