AerotechTelub acquires VMS Service bureau

AerotechTelub acquires the VMS Service bureau in Vällingby with 10 employees. The employees are offered employment in AerotechTelub and the operations will continue in Vällingby.

The acquisition means that AerotechTelub can offer the customers a more comprehensive range of services as well as a broader and more qualified development resource for the handling of drawings. The customers are primarily within the Swedish defence as well as government departments and authorities such as the Swedish National Rail Administration and the Swedish National Road Administration.

- Our resources and VMS's resources supplement each other very well. We have known each other for a long time and we will now be able to offer our customers very competitive services, says Bo Petersson, Division Manager at AerotechTelub.

- I regard this deal as the best alternative for developing the operations. In the long term, VMS was too small to keep pace with the technical development on its own. Selling to a large company that we know well, with extensive resources and a decentralized organization feels very good. In addition, AerotechTelub has broad knowledge of our customers and our operations, says Robert Lager, MD, VMS Service bureau.

For nearly 25 years, VMS has been in operation as a service bureau for micrographics. During the last 10 years the company has also worked with digital document handling and even works with the development of IT/web solutions for technical documentation. The Swedish defence is the dominating customer but Swedish government departments and authorities are also important customers, such as the Swedish State Railways, the Swedish National Rail Administration, the Swedish National Road Administration, etc.

AerotechTelub

AerotechTelub is a service company which offers qualified technical services and customer-adapted system solutions within information technology, electronics and aviation technology for the military and civil defence, government departments and public authorities as well as selected sectors of trade and industry.

AerotechTelub has 2,600 employees and a turnover of ca SEK 2,4 billion.

AerotechTelub is jointly owned by Saab, (57 %), one of the world's leading high-technology companies, and the IT company TietoEnator (43 %).
