AerotechTelub receives order worth SEK 24 million from the Defence Materiel Administration

AerotechTelub has received an order worth SEK 24 million from the Defence Materiel Administration for work with the Air Force's new tactical radio system TARAS. The order concerns technical consultancy services such as reports, measurements and analyses of the radio system.

TARAS is used for communication between combat control centres and aircraft such as JAS39 GRIPEN but also between aircraft. From a technical point of view TARAS will be among the world's most advanced radio systems for military aircraft communication.

AerotechTelub is a service company which offers qualified technical services, maintenance and customer-adapted system solutions within information technology, electronics and aviation technology for the military and civil defence, government departments and public authorities as well as selected sectors of trade and industry.

AerotechTelub is a company within the Saab-group, one of the world's leading high-technology companies, with its main operations focusing on defence, aviation and space. The group covers a broad spectrum of competence and capability in systems integration.
