AerotechTelub number one in procurement of IT consultancy services

In an evaluation of many different bidders, AerotechTelub has been ranked highest among companies that can deliver all the IT consultancy services required by 51 government authorities in Stockholm County.

The Swedish Defence Materiel Administration, as commissioned by the Swedish Agency for Public Management, has acquired framework agreements for IT consultancy services for the authorities in Stockholm County. The framework agreements will run for two years, with the possibility of a one-year extension. In all, the deal covers a purchase volume of approximately MSEK 1,000 – 1,500 per year.

“This is a major success for us, confirming that our expertise and capacity are in line with the more well-known companies in the IT industry. It is most likely that we will receive many of the framework agreements. We have built up our wide array of IT services over many years, and now have customers on all markets,” says Joakim Kruse, division manager at AerotechTelub.

The evaluation of IT consultancy services includes business development and strategy, management and control, systems development and systems administration, as well as infrastructure.

Altogether there were seven companies that fulfilled the requirements for being a full-service IT consultancy provider to the various government authorities in Stockholm.

AerotechTelub

AerotechTelub is a service company which offers qualified technical services, maintenance and customer-adapted system solutions within information technology, electronics and aviation technology for the military and civil defence, government departments and public authorities as well as selected sectors of trade and industry. AerotechTelub, a company in the Saab Group, has 2,350 employees and a turnover of approximately SEK 2.3 billion. Saab is one of the world's leading high-technology companies, with its main operations focusing on defence, aviation and space.
