Saab Metech signs metrology service agreement

Saab Metech has signed an agreement for extensive support in the field of metrology, focusing on quality assurance of measuring instruments and devices. The contract encompasses metrological support, calibration and repair, as well as development of measuring methods to secure traceability and documentation. The order runs for three years and is worth in the region of MSEK 20.

“We are extremely pleased and proud to have won this order with Ericsson Microwave Systems, and it provides further proof of the excellent solutions we can offer in the field of metrology. Our solutions enable companies to focus on their core business and to rely on having the necessary metrological support for their development and production processes. This not only reduces their costs, but they also have support from a partner who is always familiar with the latest developments in metrology,” says Hans Åberg, Vice President of Saab Metech.

Saab Metech offers the Metech Support Solutions (MSS) concept, which can be purchased as a full-service solution or as a subsystem in the area of metrology. MSS encompasses requirement analysis, instrument sourcing, measuring instrument administration, on-site and off-site calibration and servicing, as well as technical support and training.

Saab Metech offers complete service solutions within metrology and management of measuring instruments for the electronic, telecom, medical, electrical and mechanical engineering industries. Its customers can be found across Europe. Outside of Sweden, Saab Metech also has offices in Finland, Denmark and Germany. Saab Metech has 250 employees and is part of the Saab Group.

Saab is one of the world's leading high-technology companies, with its main operations focusing on defense, aviation and space. The Group covers a broad spectrum of competence and capability in systems integration.
