Deltaco distributes HIS graphics cards

Deltaco that has been distributing a full range of Nvidia based graphics cards from Point of View, now extends the portfolio with a complete range of AMD Radeon based graphics cards from HIS. The cards are distributed from the warehouse in Tullinge, Sweden to resellers in Sweden, Finland, Norway and Denmark.

HIS – High-tech Information Systems Limited, founded 1987 in Hong Kong is an authorized AMD partner. This enables HIS to build graphics cards based on the latest technology from AMD and being in the front row of development.

Quiet and reliable

HIS is well known among the users for building high performance cards with an attractive price. By using their IceQ cooling technology, HIS manage to keep the cards cool without being noisy. Low temperature extends product life also under extreme loads.

Deltaco will stock graphics cards for most needs, from totally quiet and fan less ATI HD 5450 Silence up to the extreme AMM Radeon 6990 with 4GB GDDR5.

Factory tuned cards

In the assortment there are also the Turbo versions of several models. The Turbo cards are individually tested and selected for their high performance and are overclocked from the factory for satisfying the most demanding users.

"We are glad to announce our cooperation with Deltaco today. It is really good news for HIS fans. Let's boost our business here". Says Mr. Sam Lam, HIS Business Development Manager/ Regional Sales Manager.

"We are increasing our product focus on computer components, and with HIS, we have also a strong range of video cards based on AMD Radeon. It is important for us to offer exactly what our customers want, and with HIS our portfolio of graphics cards is almost complete.", says Siamak Alian, purchasing manager at Deltaco.
