TeliaSonera provides Internet connection at the Dreamhack event

TeliaSonera International Carrier provides the world's largest LAN-party, the Dreamhack event, with Internet access via a redundant 10 gigabit network connection.

The Dreamhack event takes place June 16-19, in Jönköping, Sweden and TeliaSonera is the preferred provider and the only Internet source at the event, being the leading IP carrier in Europe. The Dreamhack event has always been a hub for young creative people to battle it out in many types of competitions; demo-coding, music, graphics, animation, game and hardware-modification, to name a few.

“This is one of the steps we are taking towards achieving our ambition to become the global IP carrier of choice for the online gaming industry,” says Anna Mossberg, Vice President Product Management and Marketing, TeliaSonera International Carrier. “TeliaSonera International Carrier meets the extremely strict quality demands of the online community and reaches more online gamers in Europe than any other carrier. We expect to increase our business within the gaming area in the next coming year,” adds Anna Mossberg.

Leveraging experience and expertise in operating a global fibre-based network, TeliaSonera International Carrier has a superb platform in place on which to build its new high capacity and highly resilient network aimed at serving the needs of the professional online gaming industry. The gaming network is fully owned and operated by TeliaSonera International Carrier which means that every link and network element is monitored and managed from a central point. Each fibre connection is fully redundant and individual streams are monitored and managed continuously. In the unlikely event of significant signal degradation or failure the network will instantaneously switch to an alternative path, without impacting quality of service to the end consumer.

“Customers are in pursuit of the best online gaming experience, and we are aware of the diverse nature of their needs and priorities,” says Anna Mossberg. “We are striving to provide complete solutions for our customers, enabling the best gaming experience possible, as we look to become the provider of choice to the online gaming industry.”

TeliaSonera is the leading telecommunications company in the Nordic and Baltic region, with strong positions within mobile communications in Eurasia, Turkey and Russia. At the end of 2006, TeliaSonera launched mobile services in Spain. We provide reliable, innovative and easy-to-use services for transferring and packaging voice, images, data, information, transactions and entertainment. In 2006, TeliaSonera's net sales amounted to SEK 91 billion, and at the end of March 2007 the total number of customers exceeded 100 million in 15 countries. The TeliaSonera share is listed on the Stockholm Stock Exchange and the Helsinki Stock Exchange, and the company is included in the Dow Jones Sustainability Index. Simplicity and service are important tools for us in creating profitable growth and value for our customers and shareholders. Read more at www.teliasonera.com.

Forward-Looking Statements

Statements made in the press release relating to future status or circumstances, including future performance and other trend projections are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There can be no assurance that actual results will not differ materially from those expressed or implied by these forward-looking statements due to many factors, many of which are outside the control of TeliaSonera.
