

## **Global IP Solutions Powers The New Yahoo! Messenger Video Calling**

### ***New Video Call Feature Available for Everyone on Yahoo! Messenger***

**San Francisco — August 24, 2009 — [Global IP Solutions](#)** (Oslo Børs: GIPS) announced today that Yahoo! Messenger, a leader in real-time communications with more than 133 million users worldwide, is using GIPS VideoEngine™ to enable new high-quality video calling with the launch of Yahoo! Messenger 10.

Since early 2006, GIPS has provided the underlying voice technology for Yahoo! Messenger, allowing friends, family and colleagues to communicate. Now with the addition of the video calling feature, everyone on Yahoo! Messenger can enjoy video calls enabled by GIPS VideoEngine for superior sound, picture quality and user experience.

"With the launch of Yahoo! Messenger 10, we're allowing people to instantly communicate with friends and family around the world through new interactive and social features like video calls," said Dave Merriwether, senior director of Yahoo! Messenger. "The GIPS VideoEngine enables us to provide the Yahoo! Messenger community with the best video experience possible. Now people can enjoy full-screen, face-to-face chats with friends and family at no cost, in the familiar Yahoo! Messenger environment."

"Yahoo! Messenger is the leading communication platform that provides people with the greatest choice to stay connected to one another through text IM, PC-based calling, mobile text messaging and now video calling," said Emerick Woods, GIPS' Chief Executive Officer. "We're proud to work with Yahoo! to deliver a truly

differentiated high quality video experience for the hundreds of millions of people on Yahoo! Messenger around the world," added Woods.
