## Dokumenthuset invests in ReadSoft's solution for automatic data capture

Reliability is essential when 15 million forms are to be processed

*Starting in January, ReadSoft's Eyes & Hands FORMS will begin to register millions of income-tax return forms at the Swedish service company Dokumenthuset. The initial order value is USD 300.000 but Dokumenthuset has a three-year option to buy software for USD 900.000.*

The Swedish service bureau Dokumenthuset, owned by Svenska Lagerhusaktiebolaget and WM-data, has been a ReadSoft customer for some time, using Eyes & Hands FORMS to handle large quantities of paper documents. Dokumenthuset is now expanding with several new large customers like the Swedish National Tax Board and the Swedish National Insurance Board. Therefore, the demand for a higher processing capacity has risen and the handling of millions of income-tax return forms requires the best possible solution. ReadSoft's software for automatic data capture, Eyes & Hands FORMS, will scan, interpret and process at least 15 million forms every year.

- Handling large document volumes requires a state-of-the-art system. ReadSoft offers a well tested and acknowledged solution and we are proud that Dokumenthuset invests in our products, comments ReadSoft's MD Jan Andersson.

For the people at Dokumenthuset, reliability and stability were the key issues when choosing software.

- Dokumenthuset is given a lot of responsibility from its customers in the document management segment. Therefore we decided to choose the best supplier on the market. We turned to ReadSoft because we believe Eyes & Hands FORMS is the best choice for what we need. Being close to the company, and knowing its future potential, made our choice easy, finishes Henrik Wahl MD of Dokumenthuset.
