**TecDoc**

TecDoc WEB SHOP

Create your own
WEB SHOP with TecDoc

New for vehicle parts-dealers!

With the new TecDoc WEB SHOP, you can add specific customer prices and your own article numbers to the WEB CATALOG and have your preferred suppliers displayed first.

This information can not only be designed individually, but also be updated daily. The possibility to connect to your own ordering/stock control system ensures maximum convenience in order processing. Your customer can place an order for the required parts with you directly online.

The design of the catalogue can be adapted to your own company colours and logos, so your customers are greeted by familiar colours and brands.
