

TietoEnator has agreed on establishing a national payment card-processing centre in Belarus

TietoEnator and the National Bank of the Republic of Belarus have agreed on establishing a payment card-processing centre in Minsk. In practice this payment card-processing centre integrates Belarus into the international payment system while local banks offer Eurocard / MasterCard services to their customers. The national level Payment Card Processing Centre providing multi-bank service is the core of the country's payment card business infrastructure and a driving force of payment card market development.

The payment card centre to be established in Belarus is based on the Transmaster system, which handles the bank's automated real-time transaction processing. Latvia, Lithuania, Ukraine, Georgia and Moldova also have national payment card centres based on Transmaster technology. The developer of this system, Tieto Konts, which is a part of TietoEnator Group, is the leading payment card systems supplier in the Central and Eastern Europe.
