

*Effective treatments for
common skin disorders*

PRESS RELEASE NOVEMBER 18, 2009

MOBERG DERMA RECEIVES GRANT FROM VINNOVA FOR PHARMACEUTICAL PROJECT

The pharmaceutical company Moberg Derma has received a grant of SEK 4,2 million from Vinnova (The Swedish Governmental Agency for Innovation Systems). The grant will be used to develop an innovative patent-protected pharmaceutical product that will further strengthen the company's position in the area of topical antifungals.

"We are very pleased that we have been awarded this grant which enables a faster development of the project and also for the recognition of our product development concept that it represents. The project will be conducted in co-operation with the Sahlgrenska University Hospital among others", comments Peter Wolpert, CEO of Moberg Derma.

Moberg Derma is developing a portfolio of medical products for skin disorders based on the company's patented technology as well as acquired projects. This spring the company announced its first commercial agreement and it intends to expand its existing product portfolio through in-house development as well as through further acquisitions.
