Press Release

Technology Nexus AB (publ) have received an initial order for solutions for secured handling of information transmitted through the digital TV network in China.

Nexus recently confirmed an order from a leading Chinese provider of solutions for distribution of information via the digital-TV network. The order for delivery of a specially developed secured access system is including both server- and client-side software as well as highly specialised hardware- based security- solutions. The initial order is valued at 6 MSEK.

" We are proud and delighted over this evidence that our proven ability to design and develop customer- specific solutions with a strong focus on business- benefit has earned us a demand for our services also in the Chinese market", says Henrik Halvorsen, Executive Vice President of Technology Nexus AB. "We have chosen to proceed in small steps and have carefully built the relationship with our Customer in China. Long term we forecast a strong increase in the demand for this type of secured infra-structural solutions for a number of different digital network-applications in China as well as Globally."
