

TCO Certified All In One PC – space saving design for you and the planet

Get full performance with minimal environmental impact

TCO CERTIFIED AIO PC

All in One PCs – a computer and display in a single unit - are a great way to get the performance of a desktop PC without the cable clutter of a separate CPU and monitor. The compact design of an AIO also enables the user to conserve space on the desktop. Ideal where space is limited or when the user wants to maintain a clean look on the work surface.

Now with *TCO Certified* for All In One you can choose a PC designed for maximum usability and minimal environmental impact. Today the increasing choice of AIOs is a welcome arrival for many consumers.

An AIO certified by TCO also gives users a reliable way to choose a product that has been designed and rigorously tested for environmental features and high performance.

AIO is the latest addition to the family of *TCO Certified* for PCs – also available are TCO Certified Notebooks and Desktops.

AN EASY WAY TO IDENTIFY THE VERY BEST

TCO Certified is your assurance that your AIO delivers all the visual performance you expect from a freestanding monitor – outstanding color, luminance and resolution.

You can also be confident that a *TCO Certified AIO* fulfills some of the toughest environmental criteria around – from strict limits on hazardous substances and energy consumption, to designed for recycling and a brand commitment to socially responsible manufacturing practices. Add to this our criteria for safety, usability and low emissions and you can be sure that every product bearing the *TCO Certified* label is among the very best.

For almost two decades, TCO Certification has been found on most of the world's leading IT brands, who look to *TCO Certified* as a way to independently verify and

designate those products that are designed for maximum performance and minimal impact on the natural environment. For you this means an easy way to make a responsible purchase that is good for you and the planet.

Technology for you and the planet

USABILITY FEATURES	EXAMPLES
Picture quality/Visual ergonomics	Several requirements for luminance, contrast, color and resolution
Low emissions	Reduced electric and magnetic fields Low acoustic noise
Designed for adjustability	Vertical tilt, height adjustability

ABOUT TCO CERTIFIED

TCO Certified is an international 3rd party certification program that makes it easy to choose IT products that are designed for the benefit of both the user and the environment. Since 1992, the TCO certification has had a considerable impact on the development of IT products by improving image quality, lowering electrical and electromagnetic fields, reducing energy consumption and minimizing the use of environmentally hazardous substances. TCO Certified is available

for displays, desktops, notebooks and All in One PCs, projectors and phone headsets.

HOW WE WORK

Developing the criteria for *TCO Certified* is a process that involves a worldwide group of stakeholders, including international specialist committees, user groups, industry networks and independent experts. Requirements are updated in line with the development and roll-out of new technologies, so *TCO Certified* is always current.

This ongoing process helps drive development towards ICT products that are increasingly designed to combine high performance with low environmental impact.

THIRD PARTY CERTIFICATION

Trust and quality assurance are key elements of the *TCO Certified* program. Every product model is tested by an independent, accredited test laboratory. Purchasers and users look to the TCO certification program as a credible tool when specifying products to meet environmental and performance needs.

TCO Development, the company behind TCO Certified, is based in Stockholm, Sweden with regional presence in Central Europe, North America and Asia.
