ComActivity AB   1-1

ComActivity Development Platform Now Available to SAP Users

ComActivity today announced that its next-generation ComActivity Business Process Platform 2.12 has been certified by SAP to run on its NetWeaver technology platform, achieving "Certified for SAP NetWeaver" status.

ComActivity's highly-graphical model-driven development platform is used to modify and improve business systems, with a focus on flexibility, rapid development time and reduced costs for businesses.

"Our platform has an outstanding reputation with developers for ease-of-use and the speed it brings to development" says Mitch Edwards, Senior Business Consultant responsible for the certification. "This certification will bring the benefits of the platform to the SAP user community and will broaden our customer base"

The ComActivity platform already runs on a broad range of Application Servers including IBM's Websphere and Apache TomCat.

"Becoming certified on SAP is a natural step for us " comments Christer Lidén, CEO ComActivity, "As our reputation grows for cost-effective business solutions that enable rapid time-to-market for our customers, we recognise that our offering is very much in-line with the goals of SAP users. We look forward to bringing our solutions to this market."

About ComActivity AB
Com*Activity* offers business software accessible over the Internet. Usability, visual processes and unparalleled flexibility resulting in greater efficiency and lower costs characterize the solutions.
ComActivity offers solutions to industries in manufacturing, distribution and maintenance. Unlike traditional vendors, ComActivity provides improvements to business processes step by step instead of having a "big bang". Less risk, rapid return on investment and the right functionality has convinced more than 100 medium to large companies to benefit from ComActivity's modern solutions.
ComActivity is supported by leading venture capital companies like Industrifonden and Via Venture Partners. Our team includes some of the most successful and experienced business systems experts. We are a global company with partners in 15 countries in Europe, America, Asia and Australia. More information is available at: www.comactivity.net
