Blueice Research Signs Strategic Alliance Agreement with TAJT Security (InfiniCom)

Stockholm, Sweden –14 March 2001 - Swedish IT-security Company, Blueice Research, and TAJT Security, a company within the Infinicom Group, have signed a Strategic Alliance Partner Agreement concerning mobile Internet security solutions. The agreement embraces products for secure mobile transactions from Blueice Research and competence within security and security infrastructure from TAJT Security.

- TAJT Security has a competence profile that really matches us. They have very deep knowledge within the PKI area and their customers have great confidence in them. They also have the ability to successfully drive their projects to completion, says Fredrik Hökegård, Sales Director of Blueice Research.

The use of mobile devices for Internet access is expected to increase dramatically over the next few years. This imposes significantly higher demands for security on the part of both service providers and consumers. Online service providers, and companies giving mobile access to their internal systems, are some of the actors that have a need for better security in order to gain a competitive advantage.

- As a result of the increasing demand for security within different social functions, the need for secure identification systems will follow this trend of strong growth. We believe that mobile solutions will become an important part of this development and therefore it is gratifying that we have started a co-operation with Blueice Research, says Tommy Brismo, CEO at TAJT Security AB.
