If you can't make it to World Expo 2010 Shanghai China to experience Motorola's live TD-LTE network and use the world's first TD-LTE dongle being launched by Motorola, we'll bring the highlights to you.

During our webinar, you'll hear a first-hand account from Bruce Brda, senior vice president and general manager of Motorola Networks, on the opening days of one of the largest cultural extravaganzas of the year. You'll also get an update on the state of the Networks business and our Q1 results.

Motorola's history-making TD-LTE network, built in conjunction with China Mobile Communications Corporation (CMCC), will provide indoor wireless broadband access across major pavilions during the event that runs from May 1 to Oct 31.

To learn more about how it's working, the significance of this TD-LTE network deployment on the industry, and the state of Motorola's Networks business, please join us for our webinar.

If you have questions about the webinar or would like to schedule a one-on-one briefing with Motorola Networks, please contact Elvan Lindberg at elvan.lindberg@motorola.com or + 46 707 44 88 93
