

## Press Release

May 11, 2010

### TeliaSonera has won a 4G license in Denmark

**TeliaSonera in Denmark has won a 4G license for the next generation's mobile broadband services and will launch 4G services to Danish customers during the spring 2011.**

Last week it was announced that TeliaSonera had won a 4G license in Denmark. Now frequency and auction details have been made public.

- We are pleased that we have secured 4G licenses early in Sweden, Norway and Finland, and now also in Denmark. We are confident that we within less than a year will be able to offer our Danish customers 4G mobile broadband services, says Håkan Dahlström, President of business area Mobility Services, TeliaSonera.

Customers' need for capacity and speed keeps growing and there is an unlimited demand for bandwidth. TeliaSonera's 4G mobile networks offer effortless use of interactive TV, videos, advanced online gaming and professional applications, services that require high speed and capacity. 4G offers speeds in mobile broadband services between 20-80 Mbit/s with a maximum speed of 100 Mbit/s.

The acquired frequencies enable TeliaSonera to build a mobile broadband network in Denmark that is more than 10 times faster than today's 3G networks. The price for 2 x 20 MHz paired spectrum and 10 MHz unpaired spectrum in the 2.5 GHz frequency band is DKK 336.3 million. The license is valid for 20 years.

**Facts:** TeliaSonera was the first operator in the world with the launch of commercial 4G services to customers in Stockholm, Sweden, and in Oslo, Norway, in 2009. During 2010, the extensive network roll out continues in 25 cities and recreation areas in Sweden and in 4 in Norway. TeliaSonera has secured deliveries for 4G modems with support for 3G and 2G during the second quarter 2010. The 4G/LTE system is based on 3GPP standards for Long Term Evolution (LTE) radio technology and System Architecture Evolution (SAE) core technology. #### Forward-Looking Statements

Statements made in the press release relating to future status or circumstances, including future performance and other trend projections are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There can be no assurance that actual results will not differ materially from those expressed or implied by these forward-looking statements due to many factors, many of which are outside the control of TeliaSonera.

TeliaSonera provides network access and telecommunication services in the Nordic and Baltic countries, the emerging markets of Eurasia, including Russia and Turkey, and in Spain. TeliaSonera is also the leading European wholesale provider of quality cross-border voice, IP and capacity services, with a wholly-owned international carrier network. TeliaSonera's services help people and companies communicate in an easy, efficient and environmentally friendly way. TeliaSonera creates value by focusing on providing world-class customer experience, securing quality in networks and achieving a best-in-class cost structure. In 2009, TeliaSonera's net sales amounted to SEK 109 billion, and at the end of December 2009 the total number of subscriptions was 148 million in 20 countries. The TeliaSonera share is listed on NASDAQ OMX Stockholm and NASDAQ OMX Helsinki. Read more at [www.teliasonera.com](http://www.teliasonera.com)
