

InnKap 4 Partners L.P. acquires stake in Oxeon AB

Founded in 2003, Oxeon has quickly established itself as the market leader in Spread Tow reinforcements. Use of these Spread Tow carbon reinforcements increases the mechanical performance of composite material products and reduces the weight. Utilization of Oxeon's TeXtreme® Spread Tow Fabrics and TeXero® Spread Tow Tapes by manufacturers of advanced aerospace, automotive, racing, industrial and sports products in applications that have critical material performance requirements has affirmed the significance of Oxeon's ultra light materials.

InnovationsKapital invests in Nordic high-tech companies with strong growth. "Oxeon AB is a very exciting company with a unique product offering and with impressive customer traction. The company has a strong management team and we see this as a great opportunity to invest in a company with good growth and profitability", says Staffan Ingeborn, responsible for InnovationsKapital's investment in Oxeon.
