TeliaSonera has chosen suppliers for mobile network in Norway

TeliaSonera is rolling out a new, modern radio network in Norway to offer increased coverage and speed. Huawei and Ericsson have been selected to build the combined 2G/ 3G/4G radio network.

“We are building a new, world class mobile network in Norway with 2G, 3G and 4G access to offer our customers a major coverage and speed improvement. We have selected Huawei and Ericsson to deliver the network based on their high quality technology and competitive total solutions, “ says Claes Nycander, CTO of Mobility Services at TeliaSonera.

Huawei is providing equipment for the southern part of the network and Ericsson for the northern part.

Extensive 4G network roll out

“In 2012, 95 percent of the Norwegian population will have 3G coverage and 89 percent of the population will have access to 4G services. This will dramatically change the way our customers can use mobile broadband services, “ says Claes Nycander.

TeliaSonera was the first operator in the world to commercially launch 4G. We offer our customers 4G in Sweden, Norway, Finland, Denmark and Estonia with speeds up to ten times higher than for today’s 3G.

More about 4G at TeliaSonera’s 4G web site www.teliasonera.com/4g

Forward-Looking Statements

Statements made in the press release relating to future status or circumstances, including future performance and other trend projections are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There can be no assurance that actual results will not differ materially from those expressed or implied by these forward-looking statements due to many factors, many of which are outside the control of TeliaSonera.

TeliaSonera provides network access and telecommunication services in the Nordic and Baltic countries, the emerging markets of Eurasia, including Russia and Turkey, and in Spain. TeliaSonera is also the leading European wholesale provider of quality cross-border voice, IP and capacity services, with a wholly-owned international carrier network. TeliaSonera’s services help people and companies communicate in an easy, efficient and environmentally friendly way. TeliaSonera creates value by focusing on providing world-class customer experience, securing quality in networks and achieving a best-in-class cost structure. In 2009, TeliaSonera’s net sales amounted to SEK 109 billion, and at the end of December 2009 the total number of subscriptions was 148 million in 20 countries. The TeliaSonera share is listed on NASDAQ OMX Stockholm and NASDAQ OMX Helsinki. Read more at www.teliasonera.com
