

HIQ IS EXPANDING IN IPTV THROUGH A NEW IMPORTANT ORDER FROM DREAMPARK

HiQ has received a new assignment from Dreampark AB in which HiQ will support Dreampark by developing an IPTV portal. The new portal will have a number of new functions and will make good use of HiQ's expertise in advanced software development and communications.

"Dreampark is a leader in its field with the most installations in Europe and is in the forefront of IPTV. HiQ has many years of experience from IPTV development projects as well as software development. We are proud of the confidence shown in us and hope for a long and fruitful partnership," says Patrik Holm Managing Director at HiQ Ace AB in Linköping.

The new portal will contain several graphically advanced functions for use in both older and newer TV boxes. It is therefore of utmost importance that the functions are as performance-efficient as possible.

"Our decision to choose HiQ as a partner is partly due to the company's combination of determination and flexibility, as well as its substantial technical experience and expertise. All of these are essential factors for success in this assignment," says Per Skyttvall, CEO of Dreampark.

"HiQ has dedicated two project teams – one located at Dreampark's offices in Linköping and one at HiQ's offices in Stockholm.

"Our business in Linköping is doing well. In a short period of time we have recruited about ten people and we are always looking for new employees because demand for our products is high," says Patrik Holm.
