BURLINGTON LAKELAND STONE – THE NATURAL ALTERNATIVE TO MARBLE AND GRANITE

Whilst marble and granite work surfaces and vanity units have helped glamorise kitchens and bathrooms over recent years, the time has now arrived for a sumptuous and functional alternative to takeover - British Lakeland natural stone.

Highly skilled stone engineers, Burlington, have access to a stone source that has been quarried for over 400 years and which is as rich and aesthetically pleasing in its colourings as it is in its tactility and functionality. Guaranteed to add the wow factor to kitchen and bathrooms that range from the most traditional to contemporary, Burlington stone provides the ultimate finishing statement for the discerning homeowner.

Perfect for those looking for a 'pièce de résistance', Burlington worksurfaces, vanity tops and splashbacks are available in a stunning palette of five natural stone and two limestones, each of which is highlighted by contrasting veins and markings that emphasise the stone's natural origins.

Consumers can choose from blue/grey Kirkby, silver/grey Brandy Crag, mid-green Broughton Moor, olive green Bursting Stone and pale green Elterwater. Or for those favouring beiges and browns, Burlington has two stunning limestones in Cavendish and Caulfeild. Whilst Cavendish delivers a hue of subtle light beiges, mid creams and soft browns, the darker Caulfeild limestone has a richer tone that is accentuated with mottled markings.

In addition to the stone colourways, Burlington's worksurfaces and vanity units can be supplied in one five edge profilings – Demi Dupont, Double Chamfer, Bull Nose, Half Bull Nose and Double pencil round. What's more, using advanced CNC machining technologies, Burlington can supply its stone machined to incorporate draining grooves and soap recesses, not to mention cut outs for sinks, bowls, taps and other accessories.

Available in two thicknesses – 20mm and 30mm – Burlington supplies its worksurfaces, vanity units and splashbacks with a 'film-less' protective sealant that helps further accentuate each stone's natural markings. Aside from the unparalleled aesthetic appeal of Burlington's natural stone, its technical properties make it an ideal material for both kitchen and bathroom environments. Not only is it extremely hard wearing and practical, it is easy to clean and maintain and the stone's integrity, beauty and hygienic conditions are preserved for life.

If you are looking for an enduring material, elegant and easy to care for, then choose the unique and exclusive properties of natural stone. After all, what better way to bring a piece of English heritage into your home, than to choose a material 400 million years in the making?

For further information on Burlington's worksurfaces, vanity units, splashbacks, or any of their other interior and exterior stone products, contact 01229 889661 or visit www.burlingtonstone.com Prices are available on application.

NOTES TO THE EDITOR

Situated in the Lake District National Park, Burlington today stands as one of the UK's leading producers of natural stone products. Combining craftsmanship skills with modern manufacturing techniques, the company uses a prestigious source of natural stone that has been quarried for over 400 years to provide a wealth of luxurious natural stone, slate and limestone products.

From sumptuous flooring, wall cladding, work surfaces, vanity units, surrounds and splashbacks within the home, to the highest quality natural roofing slate and an infinite number of external landscaping opportunities, Burlington has the capability to totally transform your home.

ISO 9001 certified, Burlington currently employs approximately 145 people, many of whom live within the National Park itself. Indeed families across several generations continue to work in what is a very traditional industry. As well as being able to offer standard products for immediate sale, Burlington has the capability of producing highly individual pieces to bespoke designs. Supporting this function, Burlington has an experienced in-house technical support team with the ability to provide invaluable advice and design assistance.

In addition to its main head office and production facility located in Kirkby-in-Furness, Burlington operates an office in Plano, Texas USA.
