Take Action Against Reactions!

Anaphylaxis is a serious allergic reaction that can be life threatening. More than one million Canadians are at risk of anaphylaxis. Take action this May in support of the Allergy/Asthma Information Association (AAIA) and see how one small step can lead to big changes.

Grow... a community of parents, children and supporters who understand the challenges of living with **anaphylaxis, allergies** and **asthma**.

Raise... critical funds for research and education while increasing awareness and empowering the community.

Share... your story and learn from other families and peers who are managing **anaphylaxis, allergies** and **asthma** and striving for a better quality of life.

This May, join the thousands who are Taking Action Against Reactions at the **EpiPen® Take Action Event**.

Take action today! Go online to Register, Donate or Volunteer.
