

Press release

Belkin Components enhances Oracle solution with StreamServe

(Stockholm, Sweden, September 5) Belkin Components, the leading manufacturer of computer peripherals, accessories, and power protection devices, including uninterruptible power supplies (UPS) and surge protectors, have chosen StreamServe to enhance its Oracle 11i application. Belkin is the preeminent technology leader in connectivity solutions for the computer and consumer electronics user and has, since the inception of the company in 1983, enjoyed 18 consecutive years of dramatic growth with gross sales exceeding \$400 million worldwide FYE/2000.

Belkin will use the StreamServe Business Communication Platform to improve the business communication from its Oracle 11i application to its suppliers, vendors and customers, leveraging StreamServe's support for customized and format-independent communication. This will also include supporting Belkin's international operations.

"We chose StreamServe based on its strong support for Oracle Applications," says James McCarthy, Director of IS at Belkin Components. "Now, we will be able to enhance our customer service through improved business communication and also reduce the time and cost associated with generating business documents."

"Belkin confirms our strategy of complete and flexible interaction with all leading ERP systems," says Richard Ovesen, President, StreamServe North America. "With the help of our Connectivity Pack, Oracle Applications users can move from traditional customer and partner communication into full-fledged eBusiness communication, all through a clean, straightforward Oracle Interface."
