VIOMA

[easy content management]

Pressrelease October 29, 2001

GT Software announces OpenMIND Server, based on VIOMA Content Manager technology.

The US company GT Software, Atlanta, Georgia, has announced a new product *OpenMIND Server*. The product will be marketed as an e-Business Application Integration platform designed to combine and transform enterprise data from multiple data sources creating composite web applications. The *OpenMIND Server* is based on the VIOMA Content Manager as a result of the technology agreement made between GT Software and VIOMA in May 2001.

GT Software is a leading provider of data integration and Web-enabling solutions that offers both e-business and back office applications. In the press release according to the OEM-technology agreement, Joe Ganem, President of GT Software said,

"The combination of GT Software's legacy integration technology combined with VIOMA's content management solution and advanced XML capabilities provides the most comprehensive and scalable e-business solutions available for enterprise wide deployment. We now have the products to provide evolutionary paths between a company's back-office and front office needs. The beauty of this is that it also provides for the most pressing needs of B2B and B2C issues while facilitating new business models and technologies".

Read GT Software's entire press release about OpenMIND Server in the well-known Enterprise Application Journal (EAIJournal) or on GT Software's web site.
