ReadSoft launches its SAP®-certified interface solution and becomes a member of the SAP Software Partner Program

ReadSoft now presents its Eyes & Hands Integration Option Pack Version 1.0, a certified interface solution for the mySAP.com® e-business platform. The solution opens up a whole new market for ReadSoft's software, Eyes & Hands Integration Option Pack, offering faster financial statements and lower costs for accounting departments.

With ReadSoft's latest Eyes & Hands Integration Option Pack Version 1.0, the need for manual keying of supplier invoices is no longer required. Instead, all incoming invoices will be automatically read, matched against order data and entered into the SAP® solution. With ReadSoft's Eyes & Hands Integration Option Pack, an SAP-certified interface solution, users handle all incoming invoices in a highly automated process, regardless of format, including paper-based, faxed, attached to e-mails or transmitted from Web pages. The integration for Eyes & Hands Integration Option Pack has been certified by SAP for its interface to the mySAP.com® e-business platform. The installation is easy and demands no further programming.

In addition, ReadSoft today announced that it has become a member of the SAP Software Partner Program. No other enterprise software company has a partner ecosystem of this size or caliber to bring customers and SAP partners together, enabling SAP customers to meet their e-business needs.

"We are opening up a very large market with this interface solution certified by SAP," said ReadSoft's MD Jan Andersson. SAP has a network of partners that we are now joining and are interested in working with. Since a good portion of the large companies in the world are running SAP solutions, the new SAP-certified interface offers great strategic benefits for both ReadSoft and our customers."

ReadSoft is the market leader in the development and sales of software for automatic data capture, which is software that automatically registers and interprets data on forms and invoices in paper or electronic format. Since its establishment in 1991, ReadSoft has evolved into a global corporation with thirteen subsidiaries in Sweden, Norway, Denmark, Germany, France, Spain, Italy, The UK, The US, Mexico, Chile, Brazil and Australia. The annual growth, for the last five years, has been approximately 70%. In 2000 the turnover was 31 MUSD. In early May the Swedish business magazine Veckans Affärer awarded ReadSoft the title "IT-Company of the year 2001."
