PRESS RELEASE   **STOCKHOLM, March 11, 2002**

Minolta Norway chooses ePortMobile for all its service technicians

On March 6th, 2002 Minolta Norway and Software Data signed a deal in which Minolta will buy ePortMobile for Palm and PocketPC for all of Minolta's service technicians in Norway. ePortMobile will be rolled-out in three phases, and will result in full use of the solution by all technicians within the calendar year 2002.

"Minolta strongly believes in the technical platform Software Data provides with its ePortMobile product. For Minolta, the solution will result in greater mobility for our service technicians, increased quality in all service assignments, and therefore greater customer satisfaction," says Morten Nygård, Technical Director at Minolta Norway AS.

"The deal with Minolta Norway is very important for Software Data. It once again shows that we deliver solutions with the right technology, and that the solutions are very beneficial to our customers," says Arild Andersen, CEO of Software Data AS.

"We are very pleased with this deal. It shows that our partner strategy is correct – by providing industry leading software vendors like Software Data with state of the art mobile software, we make our partners look even better," says Mats Bergström, Managing Director of TrustLink AB, which provides the software for the mobile aspect of ePortMobile.

About TrustLink
TrustLink is a developer of mobile business application platforms and mobile Internet enabling technologies. In the market for mobile business applications, TrustLink acts as technology partner and supplier to established ERP-, and CRM-system vendors. Ericsson is the largest owner, and has two representatives on the board of directors.
