

Pressrelease 2002-04-26

Thalamus is trusted with renewed responsibilities as an Internet provider

Real estate company Eslövs bostads AB, with 1 200 apartments, recently signed a contract for a renewed and extended three year commitment with Thalamus Operations, a subsidiary of Thalamus Networks AB.

The deal is worth approximately SEK 6 Million, and appoints Thalamus to continue delivering several services, such as Internet connections for tenants via the cable TV network.

"We are happy to conclude that our services are appreciated and that the new range of services has been popular", says P-O Andersson, CEO of Thalamus Operations AB.

Eslövs bostads AB has been using Thalamus as an Internet provider since 1999 and is consequently choosing to expand this cooperation. Together, the companies have reached a penetration of nearly 50 percent within the properties.

"A very good cooperation between Thalamus and us through the years made it simple to renew the agreement", says Fredrik Hjort, CEO of Eslövs bostads AB.

Thalamus Networks (www.thalamus.se) offers real estate companies, net owners and residents broadband based IT services, creating the foundation for efficient property management, safe and fast communication and higher real estate- and netowner value.

Thalamus Networks' turnover is SEK 40 Million and is quoted on the O list of the Stockholm Stock Exchange. The company was founded in 1987 and has about 30 employees in Ängelholm, Gothenburg and Stockholm. Thalamus Operations AB and Thalamus Consulting AB are two subsidiaries of Thalamus.
