

## **Press Release**

Stockholm June 26, 2002

# **Song Networks to connect further 81 locations for leading retail chain Jysk in Norway and Finland**

**Song Networks Holding AB (NASDAQ: SONW, Stockholmsbörsen: SONW) announced today that Song Networks A/S in Denmark and the Danish listed company Jysk (Jysk Sengetøjslager a/s) have signed a deal for 3 years**

Adding to 178 locations throughout Denmark and Sweden connected earlier this year, Jysk (formerly known as Jysk Sengetøjslager) has ordered 51 locations in Norway and 30 in Finland to be connected by a data communications network provided by Song Networks A/S. The new order covers 36 months.

The solution provided for Jysk is an IP/VPN (Internet Protocol Virtual Private Network) running on Song Networks' transmission network using the MPLS (Multi Protocol Label Switching) protocol, thus allowing for optimal usage of network capacity. The solution is prepared for distance working and travelling personnel calling in without jeopardizing network safety.

"Jysk needs a data network solution which will support new technology just now being implemented throughout our retail outlets. Our new technology is centrally based, so we demand of our supplier ample bandwidth, excellent service, guaranteed availability and monitoring of lines. We deem that Song Networks are suited to meeting our specific demands in these fields and this, together with a favourable price, is the reason for choosing Song Networks as our supplier," Mrs Pia Munck, IT Manager of Jysk, earlier stated.

"Jysk is one of the most successful and widely recognized businesses in all of Scandinavia and we feel honored that Jysk trusts us with its data communication throughout the Nordics," says Lars Netterstrøm, MD of Song Networks A/S.

**About Song Networks**, formerly Tele1 Europe, (NASDAQ: SONW, Stockholmsbörsen: SONW) Song Networks is a data and telecommunications operator with activities in Sweden, Finland, Norway and Denmark. The Company's business concept is to offer the best broadband solution for data communication, internet and voice to businesses in the Nordic region. This means that Song Networks supplies communication solutions that are attractively customized for each corporate customer. Song Networks is currently the only pan Nordic operator investing in local access networks with broadband capacity. The Company has built local access networks in the largest cities in the Nordic region. The access networks, which are linked by a long-distance network is one of the fastest data and internet super-highways in Europe, with an initial capacity for customers of up to one gigabit. The Company was founded in 1995 in Sweden and has approximately 1,000 employees. The head office is located in Stockholm and there are an additional 34 offices located in the Nordic region.
