Telelogic Signs US\$1.2 Million Enterprise Deal with Global Telecom Equipment Manufacturer

MALMÖ, Sweden and IRVINE, California – June 28, 2002 – Telelogic, (Stockholm Exchange: TLOG), the leading global provider of solutions for advanced systems and software development, today announced a groundbreaking deal with a global 500 telecommunications equipment manufacturer, creating an enterprise-level, worldwide partnership through the end of 2003. The U.S.-based client signed an 18-month master agreement for the Telelogic Tau® suite of development and testing tools. The deal, worth US\$1.2 million, includes nearly 5,000 licenses for Telelogic Tau.

The licenses will be available on demand to development teams worldwide and will be centralized on license servers in the United States. With the agreement, the company has standardized on Telelogic Tau for development and testing of its sophisticated real time systems and embedded software applications.

“This groundbreaking partnership provides them with centralized, flexible licensing and creates a single point of entry for all their Telelogic Tau needs,” said Anders Lidbeck, president and CEO of Telelogic. “By continually monitoring usage levels, we will anticipate license demand and provide just-in-time licensing – without the typical headaches associated with purchasing, licensing and installing globally distributed development tools.”

“For companies with global development teams, centralizing licensing and purchasing for common development tools – particularly those that are standards for the organization – provides great economies of scale,” Scott Raskin, president, Telelogic Americas. “As this customer quickly realized, using centralized servers allows them to balance the needs of all their development teams across time zones and project timelines. This ensures they receive the maximum return on investment for each license while reducing administrative overhead and the total number of licenses needed while reducing the overall cost of implementation.”

By providing a flexible licensing and purchasing model on a global level, the agreement elevates Telelogic to strategic partner status with the client company.

About Telelogic Tau

Telelogic Tau is the leading toolset for analyzing, designing, testing and implementing reliable advanced software systems. The Tau portfolio consists of a set of best-in-class tools: Tau UML Suite for requirements capture, analysis and object-oriented modeling; Tau SDL Suite for real-time system design and implementation; Tau TTCN Suite for rapid and thorough software testing; and Tau/Tester for testing a wide variety of systems and software applications across multiple industries and across the enterprise. These tools provide a complete integrated software development environment, supporting simulation and testing of real-time and communications applications. Telelogic Tau also offers Logiscope, a tool that facilitates quality assessments of software written in C, C++, Ada or Java.

About Telelogic

Founded in 1983, Telelogic® (www.telelogic.com) is the leading global provider of solutions for advanced systems and software development. The company's automated application lifecycle solution includes integrated best-in-class software and professional services for requirements management, change and configuration management, development, testing, and documentation. Telelogic enables organizations to improve quality and predictability, while reducing time-to-market and overall costs in systems and software development. Built on an open architecture that ensures interoperability with other leading third-party solutions, Telelogic's products are based on international standardized languages and notations. Telelogic participates in 3GPP, Bluetooth SIG and OMG to create future communication technologies and visual software development languages.

Headquartered in Malmö, Sweden, with U.S. headquarters in Irvine, California, the company has more than 1,000 employees worldwide. Customers include Airbus, Alcatel, BMW, Boeing, BT, DaimlerChrysler, Deutsche Bank, Ericsson, Lockheed Martin, Lucent Technologies, Motorola, NEC, Nokia, Philips and Siemens.
