

## Press Release

### Capio and Siemens form strategic partnership

**Capio has reached a long-term supply agreement with Siemens Medical Solutions, which will increase co-operation between the companies in the radiology area. The five-year agreement is expected to provide significant benefits for Capio Diagnostics' investment programme for radiology equipment.**

This partnership will support Capio Diagnostics' strategic objectives and expansion plans in the European market through the provision of superior technology, services and dedicated solutions, while simultaneously providing patients with the best possible quality of care. Siemens Medical Solutions is uniquely placed to deliver this, with its high profile in the market place and its leading position as a technology and solutions provider.

"A partnership of this type reflects a completely new approach within the diagnostics area. It will provide us with the opportunity to realise our aggressive growth strategy, particularly in the UK and Norway. Our plan is to invest more than SEK 250 M during a five-year-period" says Carsten Browall, Executive Vice President of Capio and President of the Capio Diagnostics business area.

In future, Siemens will supply, install, maintain and service a wide range of equipment as well as related, integrated software solutions. Siemens' status as "preferred partner" for Capio Diagnostics will in turn give the company access to Capio's medical expertise.

"We are delighted to have been selected as Capio Diagnostics' partner and we are certain that the agreement will be highly beneficial to both parties. With this partnership in place we can take a more strategic approach towards our relationship", says Gunter Dombrowe, Chairman of Siemens Medical Solutions, Northern European Region.

#### **Capio AB (publ)**

July 3, 2002
