

PRESS RELEASE

Nyköping August 26th, 2002

Lufthansa order Zonal DryingTM System for a B747-400 ex-combi aircraft.

Lufthansa Technik has ordered CTT's Zonal DryingTM System for evaluation in one (1) of Lufthansa's B747-400 ex-combi aircraft. After successfully performed In-Service evaluation Lufthansa will have the option to equip their remaining six (6) B747-400 ex-combi aircraft with CTT's de-humidification system.

Delivery of the system is planned for first quarter 2003.

The Zonal DryingTM System combats condensation in the thermal and acoustic insulation of modern passenger aircraft. It eliminates unwanted "Rain In the Plane" and reduces maintenance costs by extending the service life of the aircraft's insulation. By eliminating accumulated condensation, the system also cuts non-revenue weight which, in turn, leads to significant fuel savings. Last but not least, the Zonal DryingTM System helps reduce corrosion and the risk of electrical faults by maintaining a dry environment between the interior trim panels and the aircraft skin.

To date, CTT has the following additional customers for the Zonal DryingTM system:

- **Martinair** for B767-300 and MD11
- **Jet Aviation** for Executive aircraft's B767-200, B757-200 and Boeing Business Jet
- **KLM Royal Dutch Airlines** for MD11 and B767
- **Austrian Airlines** for MD80
- **LTU** for Airbus A330
- **Raytheon Systems Company** regarding NASA/DLR SOFIA-project (Stratospheric Observatory For Infrared Astronomy)
- **Swissair** for MD11
- **Sterling European Airlines** for Boeing B737-800
- **Hapag-Lloyd** for Boeing B737-800
- **Icelandair** for Boeing B757
- **Lufthansa CityLine** for CRJ 100/200
- **Airbus** as option for A330 and A340
- **FMV (Swedish Airforce)** for C130 (Tp84) Hercules
- **Adria Airways** for CRJ200
- **Emirates** for A330

- **Saudi Arabian Airlines** for MD90
- **Air Berlin** for B737-800
- **Tyrolean Airways** for CRJ 100/200
- **Air 2000** for A320 and B757

and for the Zonal ComfortTM System:

- **SAS** for Boeing B767
