## **Dimension receives order from major Baltic bank**

**One of the IT integrator Dimension's Baltic subsidiaries has received an order to design and implement a data storage solution for one of the region's largest banks. The order value is approximately SEK 13 million**

In 2001 Dimension established two subsidiaries in the Baltic region. Operations in the region have developed very positively, with a number of strategically important orders.

When one of the region's largest banks decided to replace its entire data storage environment, the job of designing, supplying and implementing the advanced SAN solution was given to one of Dimension's subsidiaries. Dimension's lengthy experience with similar solutions, together with its ability to offer test environments and training for the specific solution, was the decisive factor in the bank's choice of new IT partner.

The SAN solution provides the Baltic bank with a centrally administered data storage environment with extremely high availability that also reduces its overall administrative and operating expenses.

"Our Baltic efforts have developed very positively," says Sven Uthorn, Managing Director of Dimension. "Through our subsidiaries, we can meet the region's large demand for business-critical IT infrastructure, and we have a strong position today as an IT integrator in fast-growing market segments in the region."

Dimension's subsidiaries in the Baltic region have previously worked with a number of large projects for clients in the energy, banking and finance, and telecom sectors.
