Telia signs agreement for co-locating 3G operator masts

Telia Mobile AB signed a framework agreement today with 3G-operator Hi3G, covering the co-location of masts.

According to the terms of the agreement, Telia Mobile AB will lease space on its existing masts in Sweden, on market terms, for co-locating and installing the UMTS antennas of the other company, where there is available space. Telia Mobile is equally granted co-location in Hi3G:s masts.

"It's pleasing that we operators in the industry have signed an agreement based on sound business-like principles that all involved parties are satisfied with," commented Kenneth Karlberg, President of Telia Mobile AB.

Telia Mobile has previously reached framework agreements with Orange and Tele2 about co-locating their UMTS antennas on Telia Mobile's masts.
