

Teleca signs framework agreement with Sweden Post

Teleca has renewed its framework agreement with Sweden Post, the Swedish post office administration. The agreement provides all operating units with Sweden Post access to Teleca's combined expertise within IT consulting services. The framework agreement is valid for one year and includes technical project management and system development.

"We have a good co-operation with Sweden Post today and we view this renewed trust as confirmation that the customer is satisfied," says Erik Linse, Consultant Manager at Teleca AU-System. "We are looking forward to working together in the future with the company's continuing IT development."

Teleca has previously been involved in a number of IT projects at Sweden Post, including work with implementation of a new version of Sweden Post's national data network.
