

## **Semcon runs Boverket's IT-environment**

In the face of strong competition, Semcon has won the contract for Boverket's IT-environment operations. The agreement will run for three years with the option for Boverket to extend the agreement for a further two years.

"Semcon has once again submitted the most favourable offer," says Stefan Norrman, IT Strategist at Boverket.

The assignment is a full-coverage commitment in which Semcon is in charge of all IT operations and user support for a fixed monthly cost. Semcon will handle support for around twenty servers and about 160 users. The order is estimated to be worth SEK 8.5 million for the first three years.
