

Ivarson Inc. chooses Jeeves Enterprise for its customization abilities

(JEEV) Jeeves Information Systems AB's subsidiary, Jeeves North America Inc., has signed a contract with Ivarson Inc., Milwaukee, Wisconsin, USA for delivery of the ERP system Jeeves Enterprise. The initial order value is approximately USD 90,000 including licenses, implementation and project management. The deal comprises Jeeves Enterprise modules that will support Ivarson's financial and manufacturing processes and the initial licenses are for 28 users.

Ivarson Inc. is one of US' industry-leading manufacturers of equipment for the food processing and packaging industry. Jeeves Enterprise fully integrated system will allow the customer to concentrate on its core business and optimize the operations by eliminating double data entry, keeping track of sales and costs, and allowing multi-currency handling for import and export to the North American, South American and European markets.

"Jeeves Enterprise's functionality and integration capabilities will provide us with huge time and labor savings, as well as improve job tracking and costing", says Erik Ivarson, Vice President at Ivarson Inc.

With Jeeves Enterprise the customer gets a system package that really supports their financial and manufacturing processes. The General Ledger will be fully integrated with the rest of the system, and will keep track of all transactions so that it is in balance every moment.

"We are really impressed and pleased by the customization abilities that Jeeves Enterprise gives", concludes Mr. Ivarson.

About Jeeves Enterprise

Jeeves Enterprise is a complete business system in a Windows environment, which thanks to its openness is an unbeatable platform for web applications and e-commerce. Thanks to our unique design, customer adaptations are preserved upon update to a later version. The software contains a comprehensive range of routines from Accounting, Logistics, Service, Time & Project to CRM and SCM (Supply chain Management). Jeeves Enterprise has a flexible and customizable user interface that also contains a powerful macro language that is used for customer adaptations. The flexibility and adaptability available in Jeeves Enterprise makes it a suitable solution for major companies wanting a common business system for their medium-sized and smaller subsidiaries.
