MIOTEC GRANTED THE ISO9001 QUALITY CERTIFICATE
Personalization process VISA-standardized

Miotec's ISO9001 quality system covers the entire card production process beginning with the product development of cards and software to marketing, sales, purchase, production and personalization services. The standardization of quality system provides Miotec's customers and partners with a guarantee that company's way of working complies with the requirements of an appreciated standard. The ISO9001:2000 quality certificate was delivered to Miotec by SFS-Certification.

Visa has approved Miotec's personalization process for magnetic stripe cards.
Visa certification means that Miotec can personalize Visa card products and deliver them to Visa Members all over the world.

Miotec develops, markets and produces cards and chip-related software for secure transactions. Miotec's core competence lies in specific smart card technologies, combinations of them, and related software. Biometrics, PKI and RFID enable information security and physical security to be combined in a single card. Miotec functions comply with BS7799 Information Security and ISO9001 Quality Certificate specifications. Miotec's card personalisation process is Visa certified. Important customers include companies with extensive loyalty programmes or needing organization cards, the public sector, and banks and credit institutions. Miotec's partner network is built up of system integrators and software houses, security system providers, teleoperators and local card manufacturers. For further information: www.miotec.fi
