CSC expands content charging solution based on the MediationZone™ product at Tele2 to include the Norwegian market

Stockholm, 17th of February, 2003 – Computer Sciences Corporation (NYSE: CSC) has successfully implemented an extended Content Charging Solution based on the MediationZone™ product from DigitalRoute to support Tele2s wireless customers in Norway. The project was successfully completed within a 6-week period. CSC and DigitalRoute initially implemented the platform in a joint effort in 2002 for the Swedish market. During the fall 2002 it was extended to include processing of MMS (Multimedia Messaging Service) events. The platform supports billing of end customers (wireless, fixed line, internet) for content services, such as ring tones and pictures, provided by 3rd party content providers. An example of capabilities of the platform is to perform real-time charging and customer validation for both prepaid and postpaid customers.

About Tele2 AB

Tele2, formed in 1993, is the leading alternative pan-European telecommunications company offering fixed and mobile telephony, data network and Internet services under the brands Tele2, Tango and Comviq to more than 16.8 million people in 21 countries. The Company is listed on the Stockholmsbörsen, under TEL2A and TEL2B, and on the Nasdaq Stock Market under TLTOA and TLTOB.

About CSC

Founded in 1959, Computer Sciences Corporation is one of the world's leading information technology (IT) services companies. CSC's mission is to provide customers in industry and government with solutions crafted to meet their specific challenges and enable them to profit from the advanced use of technology.

With nearly 64,000 employees, CSC provides innovative solutions for customers around the world by applying leading technologies and CSC's own advanced capabilities. These include systems design and integration; IT and business process outsourcing; applications software development; Web and application hosting; and management consulting. Headquartered in El Segundo, Calif., CSC reported revenue of \$11.3 billion for the 12 months ended December 27, 2002. For more information, visit the company's Web site at www.csc.com.

About Digital Route AB

Founded in 2000, Digital Route is a privately held, independent software vendor headquartered in Stockholm, Sweden. Digital Route was founded on the vision of revolutionizing the market for mediation systems, and to provide a system that is able to meet the complex, and in many cases, uncertain needs of a next generation operator, while simultaneously reducing the complexity and expense of operating and maintaining the system. More information can be found at www.digitalroute.com.
