

Södertälje municipality signs agreement with Sign On

Södertälje municipality has signed an agreement with Sign On for design and distribution of forms via the municipality's Web site.

In 2002 the chairman of the municipal executive, Anders Lago, initiated a 77-point list for a better Södertälje. The list covers everything from opening more upper-secondary schools to environmental impact. One of the points is "We are trying new ways of increasing contact and participation via the municipality's home page, www.sodertalje.se".

The deal with Sign On offers citizens a simple way of using the Internet for notifications and applications via the municipality's home page.

- Providing digital forms at www.sodertalje.se is an excellent and self-evident service for the municipality's residents, says Mattias Johansson, Web editor for Södertälje municipality.

- Sign On is reinforcing its role as a total supplier of form solutions for the Internet. Being selected by Södertälje municipality to provide this service further strengthens our established position as market leader, comments Andreas Halvarsson, executive vice president of Sign On.
