Jeeves expands in the Netherlands with HIJUM deal

(JEEV) Jeeves Information Systems AB's partner JIS Nederland BV in the Netherlands, has signed an agreement with the HIJUM Group BV for the delivery and implementation of the Jeeves Enterprise ERP system. The deal includes the following Jeeves Enterprise modules: Inventory, Sales, Purchasing, General Ledger and CRM for 16 users. The initial order value is SEK 900,000.

The HIJUM Group is specialized in metal cutting tools for shipyards and the airplane industry. Right now the company is in an expansive phase and is facing a growing demand from the customers.

"Jeeves Enterprise is a scalable and modern ERP system – exactly what we need to support our offensive expansion. We want a system that enables full integration into our customers and suppliers, so we can increase our service level. High availability of our products and shortened delivery time are crucial for us to stay competitive and the investment in Jeeves Enterprise is a vital strategic decision", says Marcel Van Hijum, CEO of the HIJUM Group BV.

"Jeeves Enterprise has a very user-friendly interface and can easily be adapted for the HIJUM Group's specific needs. The system's unique technical platform enables easy upgrades and scalability, providing the HIJUM Group a system that grows with the company at a low Total Cost of Ownership (TCO), says Jos Bruins, CEO of JIS Nederland BV.

"The reason we chose Jeeves Enterprise is because it is open, user-friendly and very flexible – a system that easily can be adapted to our way of working. It is amazing how easy it is to make your own adaptations of screens and fields without any extra programming and still retaining all adaptations after upgrades. We chose JIS Nederland as IT partner thanks to their experience and their ability to understand our business", concludes Marcel Van Hijum.

The agreement with HIJUM confirms that Jeeves Enterprise easily and successfully can be adapted to the needs of different industries and niches.
