Eurotrade cuts the minimum commission for trading to SEK 99

Eurotrade Securities S.A. in Luxembourg has cut the minimum commission for Internet trading to SEK 99, with effect from July 1st. Eurotrade is a Discount Broker and offers Internet trading and personal brokerage services.

“By cutting the minimum commission to SEK 99 from SEK 200, we are improving our offer and become a much more competitive alternative in comparison to the Swedish Internet brokers Nordnet, Avanza and E*trade”, says Anders Thonning, General Manager at Eurotrade.

Launches trading in Danish and Norwegian shares

Eurotrade now offers trading in Danish and Norwegian shares via the Internet and personal broker services, with effect from July 1st. The trading is totally integrated with Swedish shares. With this new service Eurotrade is positioning itself as a very competitive alternative to Internet brokers in Denmark and Norway, such as Nordnet, Stocknet, Netfonds and E*trade. The minimum commission for trading in Danish and Norwegian shares is DKK 99 and NOK 99.

“Danish and Norwegian citizens living abroad did not have any cost efficient alternative to local Internet Brokers until now. In Denmark and Norway the interest in Swedish shares is high, which makes Eurotrade an even more interesting alternative. Eurotrades commission for trading in Nordic shares is now down to as low as 30% of the commission that some of the big Nordic banks in Luxembourg are offering”, says Anders Thonning, General Manager at Eurotrade.

Eurotrade is part of the Nordnet Group and can therefore provide its client with leading technical solutions for securities trading over the Internet.
